

Creation of False Enemy is the fundamental technique behind social control systems

Stan Bleszynski, 19-Aug-2020 (remote viewed material [1,2,3], abbreviated and sanitized)

Creating a False Enemy is the fundamental technique behind dualistic religions, marxism, all other ..isms, product marketing, crowd control, influencing of population and the governing technique employed by the current and past ruling elites! There is more to it. Will follow.

Similar to the Pathogenic Priming effect in immunology, creating antibodies arming the immune system against the non-existent threats, against benign microbes or against symbiotic agents, such that when a dangerous immune trigger does occur, the immune system (like the misguided human society) ends up attacking itself and destroying itself. More to follow..

Specifically, an idea that the Primary Spirits (Dark Angels) are the enemy who have to be fought against, has been intentionally planted in the Human collective unconscious by the power elites for the purpose of triggering human societal autodestruction. People who fight against that force end up fighting against themselves.

Why is fighting against the Dark Force so autodestructive? Because the True Dark consciousness of the Primary Universe is the first part of Creation supporting and sustaining the Secondary Universe, the Electromagnetic Universe of Love and Light. If you fight against the Primary Universe you are effectively but unknowingly undermining your own material being.

(see "Pagan Trinity concept" [4])

How do they inject hatred against the Dark Angels into the human population? Through occult rituals during which human beings are traumatized by the perpetrators dressed in costumes and masks representing the ideas and symbols intended to be hated. The symbols of hate are repeated in the mass media to reinforce the subconscious telepathic message acting in the same fashion as a post-hypnotic trigger. Humans have very strong empathy causing most people to feel deep pain if something bad is happening even to one child!
