**Article Info**

**ABSTRACT (10 PT)**

**Article history:**

Received mm dd, yyyy

Revised mm dd, yyyy

Accepted mm dd, yyyy

**Keywords:**

First keyword;

Second keyword;

Third keyword;

Fourth keyword;

Fifth keyword.

A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. **The Abstract should be 200 to 250 words in length.** The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article. Keywords: keywords are crucial to the appropriate indexing of the papers, contain three to five words/phrases, and should be separated with a semicolon (;), not a comma (,). (9 pt)

## 1 INTRODUCTION (10 PT)

The main text format consists of left-right flat columns on A4 paper (210 x 297 mm). The text margins from the left and top are 2.5 cm, right and bottom are 2 cm. The manuscript is written in Microsoft Word format, single-spaced, Time New Roman 10 pt and a maximum of 10 pages, which can be downloaded on the website: <https://journal.universitاسbumigora.ac.id/index.php/matrik>.

The introduction should provide a clear background, a clear statement of the problem, relevant literature on the subject, the proposed approach or solution, and the new value of the research that is an innovation. The introduction should be understandable to colleagues from various disciplines. The organization and bibliographic citations are made in IEEE style in [1, 2] marks and so on.

## 2 RESEARCH METHOD (10 PT)

Explaining research chronological, including research design, research procedure (in the form of algorithms, Pseudocode or other), how to test and data acquisition [1-3]. The description of the course of research should be supported references, so the explanation can be accepted scientifically [2, 4].

Tables and Figures are presented center, as shown below and cited in the manuscript.

Table 1. The Performance of ...

Variable	Speed (rpm)	Power (kW)
x	10	8.6
y	15	12.4
z	20	15.3

Explanation/description of the images displayed must be appropriate and relevant to the research image

Figure 1. Effects of selecting different switching under dynamic condition

## 3 RESULTS AND ANALYSIS (10 PT)

In this section, it is explained the results of research and at the same time is given the comprehensive discussion. Results can be presented in figures, graphs, tables and others that make the reader understand easily [2, 5]. The discussion can be made in several sub-chapters.

### 3.1. Sub section 1

Equations should be placed at the center of the line and provided consecutively with equation numbers in parentheses flushed to the right margin, as in (1). The use of Microsoft Equation Editor or Math Type is preferred.

$$E_v - E = \frac{h}{2.m} (k_x^2 + k_y^2) \quad (1)$$

All symbols that have not been mentioned in the equation should be explained in the following text.

### 3.2. Sub section 2

Proper citation of other works should be made to avoid plagiarism. When referring to a reference item, please use the reference number as in [1] or [1, 3, 5, 6] for multiple references. The use of "Ref [5]..." should be employed for any reference citation at the beginning of sentence. For any reference with more than 3 or more authors, only the first author is to be written followed by et al (e.g. in [4]). Examples of reference items of different categories shown in the References section. Each items in the references section should be typed using 9 pt font size.

## 4 CONCLUSION (10 PT)

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Analysis" chapter, so there is compatibility. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion).

## 5 ACKNOWLEDGEMENTS (10 PT)

Collate acknowledgements in a separate section at the end of the article before the references and do not, therefore, include them on the title page, as a footnote to the title or otherwise. List here those individuals who provided help during the research (e.g., providing language help, writing assistance or proof reading the article, etc.).

## 6 DECLARATIONS

### AI USAGE STATEMENT

During the preparation of this work, the author(s) used [NAME OF TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

#### *Example:*

During the preparation of this work, the authors used ChatGPT (OpenAI) to improve the language and clarity of the manuscript. After using this tool, the authors reviewed and edited the content as needed and took full responsibility for the publication's content.

### AUTHOR CONTRIBUTION

This section must be filled.

### FUNDING STATEMENT

This section must be filled.

### COMPETING INTEREST

This section must be filled.

## REFERENCES (10 PT)

The main references are international journal articles. All references must refer to the most relevant, current sources and the minimum reference is 15 articles. References written must use Mendeley in IEEE style. Please use a consistent format for reference - see example below (9 pt):

### References from Journal Articles

[##] Author, "The title of article," name of Journal, vol. , no , pp, year of publication. DOI

Example

- [1] K. Marzuki, A. Setyanto and A. Nasiri. "Audit Tata Kelola Teknologi Informasi Menggunakan COBIT 4.1 Domain Monitoring Evaluasi pada Perguruan Tinggi Swasta, ", BITe: Journal Bumigora Information Technologi, Vol. 3, No. 3, PP. 1-10, 2021, DOI: <http://dx.doi.org/10.30700/pss.v1i1>

### References from books

#### Entire Book

[##] author, the title of book, edition (if any), Place of publication: Penerbit, Tahun terbit.

#### Example

[1] P.M. Morse and H. Feshback, Methods of Theoretical Physic. New York: McGraw Hill, 1953.

#### Part of the book

[##]Author, “Chapter Title”, Book Title, Edition (if any). Place of Publication: Publisher, Year, page.

#### Example

[2] P.S. Meszaros, S.Lee and A. Laughlin, “Information processing and information technology career interest and choice among high school students,” Reconfiguring the Firewall, Wellesley: A K Peters, 2007, 77-86.

## Warning

We really appreciate the submitted manuscript, but there are many fatal errors from the author who does not read the guidelines in this TEMPLATE carefully, so that the submitted manuscript does not comply with the template rules. For some reason, scripts that don't match the template are sometimes **rejected immediately** without comment and/or ask to be corrected if the error is minor. For that, it's a good idea to read this guide over and over again, check and recheck before submitting the manuscript. The goal is to speed up the manuscript process in LOGIRITHM Journals and indirectly help Journal managers. For the fun, thank you.
