

Math Parent PLC

Unit 2 Preview

We had an amazing response to our Unit 1 preview, so we are going to offer it again this Unit! We also created a Schoology course that all parents are welcome to join to access the presentation slides as well as additional resources to help support your teaching at home. We will continue to build this course over the year for our community of math people!

Course Name: CAV Mega Math: 19-20

Access Code: 24X3-6CMC-9M64T

Our goal in these previews is to help you plan how you will be teaching the upcoming material to your student and provide an opportunity to collaborate. Like our first session, this unit preview will be aimed at highlighting key concepts and sharing tips to help our students gain deep conceptual understanding as well as procedural understanding.

DATES: Wednesday, October 9 &
Friday, October 11

5-6 Grade PLC will be from **2:00-3:00** with a 30 minute Q&A to follow. Topics will include order of operations and reverse order of operations a.k.a. equations; fractions and integers on the numberline; and everybody's favorite: tackling word problems. Please use the following [Sign Up Genius link](#) to RSVP to **either** the 10/09 **or** 10/11 session.

7-8 Grade PLC will be from **9:00-10:00** with a 30 minute Q&A to follow. Topics will include equation essentials: operations of real numbers, variables, and properties; and beyond basics: inequalities, absolute value, and functions. Please use the following [Sign Up Genius link](#) to RSVP to **either** the 10/09 **or** 10/11 session.

Before the meeting, please be sure to review the unit material and come prepared with any questions you may have on teaching Unit 2 content.
