Note – If the SMS service used by your practice does not include your practice name as the sender we suggest adding "From [GP practice name] as the first line of the message"

SMS initial message:

We are contacting you to invite your child to take part in the ASYMPTOMATIC study. By taking part, they will help us decide the most effective treatment for children who live with asthma. Children in the study use a preventer inhaler either daily or only when needed, for a year. Our practice thinks both of these are good options for your child.

There are 4 short online questionnaires to complete over the year, but there are no extra visits or tests.

You can watch a short video here: https://bit.ly/asymptomatic_video

Or read more information here: https://bit.ly/asthma_study

Note you may like to include the expression of interest form link as this also includes the information sheet e.g.

Or read more information and tell us if you'd like to take part or not here https://bit.ly/ASYMPTOMATIC_EOI_V2

To take part or to arrange an appointment to talk to someone about the study, reply YES. Or you can call our direct study number 07971307807 To decline, reply NO.

Thank you
