

**Curriculum Review Committee Minutes
Wednesday, March 11th, 2026**

The BCRC team met to discuss an upcoming AI policy and the draft Math Project Plan.

The AI discussion centered on what should be in an AI policy and how we balance ensuring students still learn content while beginning to teach students how to use AI to be more efficient and effective and to prepare for the workforce.

The Math Project Plan was presented by Ted Knight. Current state data was shared, as were goals. The plan included the initiatives that are being recommended over the next one to five years. The group unanimously approved the plan and it will go to the full Board for discussion on March 24th, 2026.
