## Personality

She's a **warm-hearted** soul with a strong sense of love and **loyalty**. **Confident** in herself and fiercely **protective** of those she cares about, she often takes on the role of guardian without hesitation. Her natural **curiosity** drives her to explore the unknown, and while she's **obedient** when it counts, her quiet **determination** pushes her to follow through on what she believes is right. Though her kind nature sometimes makes her **easily persuaded**, and she has a tendency to be a bit **clumsy under pressure**, she always means well. **Stress** can get the better of her at times, but she keeps going—with heart, hope, and the will to protect.

## History

### A Vine Takes Root

-

Melon was born to Honeydew and Sasha within the safe confines of the Swift Colony, nestled next to Momo, Cantaloupe and Harley. Melon was the first kit, and being the biggest she got the advantage of reaching all her siblings in cuddle time. She was never alone, even when she's not with her family, Melon is sneaking off to hear tales from the other cats, experiences of life outside the ever shrinking den. Some tales have spooked her, she has a growing urge to protect her colony no matter what.
