**Discussion of each accomplished task for the current Milestone:**

Task 1)  The goal of this task was to create a preview of the PDF generated by the access page on the webpage. We do this so that users can see what the filled PDF looks like and continue filling PDFs if they wish. We do this by manipulating the embed to force a get request to a page that shows the PDF preview.
 Task 2) The goal of this task was to redesign the webpages to be more user friendly which was accomplished by changing the layout as well as the colors.
Task 3) The goal of this task was to create the user manual.

**Discussion of contribution of each team member to the current Milestone:**

Bradley Felix: Assisted in the requests to show the PDF. We were able to show the PDF on the access page after the user fills in their information without redirecting into another page. Not only that, but they still have the option of going back to other pages after showing the preview.

Skieler Kowalik: I worked on managing the requests to get to the page that shows the PDF without the user clicking on anything. I also fixed a lot of issues with unlinking and writing the temporary filled PDF.

Kyle Kline: Redesigned the webpages with Ethan to be user friendly and made the web pages look more professional and interesting.

Ethan Banks: Worked on redesigning the user interface to be more user friendly and implemented the sidebar. Worked on the user manual.
