

Bandit
nBn or BnBn

- Bandit is a marking that is meant to have a certain look, so it won't be rolled for density and spread.
- It's always black or darker than the base.
- Variant expression is the same.

General Max Striping:

Striping appears on face, ribs, neck, shoulder, legs, and tail.

General Minimum Striping:

It appears on the face, tail, legs, and ribs.

WITH SECONDARIES:

You can outline and fill the stripes. You can also put the secondary in between the stripes that extend from top to bottom completely. Secondary color stripes will not show outside the striping groups.

GROUP EXAMPLES:

Inky Black Bandit

Smokey Aqua Bandit

Black Tortoiseshell Pangare Bandit
