

Statement from Bush Worker Collective 26th December 2023

**RE: Protection for Anti Genocide Workers**

This statement from the Bush Worker Collective has come about due to the ongoing genocide of Palestinians, in which the Australian Government is complicit. The Australian Government provides permits for the export of military hardware through private manufacturers, and intelligence via Pine Gap, to the Israel Defence Force (IDF).

The Bush Worker Collective is calling on all employers to uphold workers rights and current positions, and to guarantee that employees will not be coerced, pressured, or negatively impacted in their place of work in any way due to their Anti Genocide stance.

We make this call in accordance with the protections against discrimination and adverse action as outlined in the communiqué from the Australian Workers Union below.

We call on all employees to guarantee that workers will not face any breaches of their rights or loss of job position due to their engagement in the Palestinian or any other anti genocide struggle.

Sincerely and in Solidarity,

Bush Workers Collective *From unceded Kulin Lands*
