Write a two paragraph 300-500 word essay in a google doc that answers ALL the following prompts. Each prompt below represents what should be in each paragraph.

1. What is a problem you think artificial intelligence or automation will cause for the human race? Why is this a problem? (1 point for the problem and 4 points for explanation)

2. What methods, as a society, can we use to combat this problem and why do you think these methods will be effective? Justify your reasoning with evidence from our discussion and/or your own research. (2 points for the solution and 3 points for justification)

Potential Problems Discussed in Class (choose one):
- Retraining people who lose jobs due to automation/AI
- More education is being required for entry level jobs
- Less human interaction is occurring due to ai and automation
- Wealth Inequality
- AI will make humans less intelligent as we become more dependent upon them
- If we achieve a society run by machines, how will humans spend their time?
- U.S. Productivity has decoupled from Median Household Income
- …
