

NCUC-At-Large joint session at ICANN 60, Abu Dhabi, UAE.

Title: “ICANN: what can we build together?”

(Requested time:)

(Session:

<https://schedule.icann.org/event/CbFq/gnso-non-commercial-users-constituency-ncuc-outreach-meeting>)

1. Session description:

Building on a success of the joint NCUC-EURALO session at ICANN 58, this session represents a joint event of the NonCommercial Users Constituency (ncuc.org) and At-Large for local Academia and Civil Society. The joint event aims to target academia, civil society, and individual users. It will be built around specific issues of interest to inform the audience about on-going policy processes at ICANN and discuss in an interactive manner how people and organisations who want to join can contribute.

Description for the announcement:

If you want to get engaged with ICANN and join its communities of noncommercial users or end users, we have arranged a session for you that will make it easier to navigate the ICANN maze. This session will give you enough information about ICANN from the perspective of two groups: Noncommercial Users Constituency and At-Large. You will see how different NCUC and RALOs are and how closely we work together. You also get a good grasp of what topics are going to be discussed during ICANN 60. The session can provide you with a pathway to getting more engaged with ICANN and policymaking.

The document is closed from now on, sorry all. Someone made changes in “editing” mode and we struggled with restoring what we had. Thanks all for your help, but any changes are closed now as we have to start publishing it anyway. It will be proofread again so no need to correct any grammar. All the comments can be submitted via email. Tatiana.

2. Agenda and resource persons

AGENDA:

15.15-16.45

1) INTRO. ICANN, NCUC and At-Large: what can we build together?

A very short pitch-talk Introduction to ICANN, NCUC and At-Large: (no more than 2-3 min for each) [30 minutes]

- NCUC and its governance: Farzaneh Badii

- (placeholder for At-Large Intro)
- what is the difference between NCUC and At-Large structures?

2) Issues of interest. (moderators: __) + resource persons for pitch talk on each issue (60 minutes)

- An introduction to Working Groups: Where we develop policy and your pathway to engagement
 - Privacy protection in WHOIS Data (Stephanie Perrin)
 - Geographic top level domain names, should governments have them all? (Robin Gross)
 - Louise Marie Hurel (What is trademark overreach and how is it shaping in the rights protection mechanism group)
 - How do RALOs contribute to working groups
- How did we make ICANN accountable to the Internet community? (phase 2)
 - ICANN respect for Human Rights (Tatiana Tropina)
 - The nearly victorious Jurisdiction group(Greg Shatan)
 - Transparency (Michael Karanikolas)
 - Diversity (Rafik Dammak)

30 minutes break

17.15 to 18.30

- Hot Topics - (45 mins)
 - Privacy: Stephanie Perrin
 - Sanctions and ICANN: Farzaneh
 - ICANN is not a content regulator: Milton Mueller
 - DNS Abuse (Some technical reality from a technical expert, Patrik)

3) How to get involved (processes). (Moderators: __) + resource persons for pitch talk on each point. (15 minutes)

- Joining WGs
- Public comments (NCUC/At-Large perspective)
- Onboarding Program (Ayden)

5) How can you be rewarded for your work? (or opportunities at NCUC and ICANN) (15 minutes)

- Global Stakeholder Engagement (Adam Peake)
- Opportunities at NCUC
- Opportunities At-Large

4) Wrap up

___ Internal only

3. Target audience

- Local academia
- Local and regional civil society organisations, which are interested in understanding or being part of the ICANN Policy Processes
- Local and regional end users
- ICANN fellows/NextGen, especially newcomers

4. Reaching the target audience

Local community (civil society, academia)

- Email to the NCUC list (**Tatiana**), asking members to spread the word about outreach among their local connections + contacting people in our networks who work or live in the region or have other connections to the region
- Email to At Large mailing lists (**___NAME___**), asking members to spread the word about outreach among their local connections..
- Reaching out to local universities/research centres through our connections.
- Help from ICANN staff.
- Blog post on the NCUC web-site, adding the blogpost to the ICANN regional newsletter.

ICANN fellows/NextGen

- Identifying ICANN fellows/NextGen who might be interested in this event and inviting them. Spreading the word via Siranush.

ICANN newcomers

- Stating clearly in the description of the event on the web-site that the event targets also newcomers from CS, Academia and End users

- Identifying newcomers among our network - e.g. those supported by NCUC as mentees

Existing NCUC/At-Large members (not newcomers but those interested in getting more involved).
