

Artificial Superintelligence Alliance Member Fetch.ai, Welcomes Alibaba Cloud as a Network Validator, Paving the Way for Web2 and Web3 Integration

October 30, 2024 – Artificial Superintelligence Alliance (ASI) founding member, Fetch.ai, a decentralized AI infrastructure provider, has today announced a significant development in its network by welcoming Alibaba Cloud as a network validator. This integration is facilitated through Cloudician, a key Web3 ecosystem partner of Alibaba Cloud in the APAC region. It underscores both companies' commitment to bridging Web2 and Web3 technologies, aiming for widespread adoption and transforming the digital landscape, including advancing AI applications.

In blockchain networks, validators play a crucial role in verifying and validating transactions, ensuring the accuracy and security of decentralized ledgers. Alibaba Cloud is renowned for its high-quality and stable infrastructure, which will significantly bolster the security of [Fetch.ai](#) Network that is part of the Artificial Superintelligence Alliance.. Leveraging Alibaba Cloud's global network with superior bandwidth and worldwide transmission capabilities will augment local network access and facilitate cross-region application deployment. This improvement promises to elevate user experiences with public network services, enhance network quality and security, reduce latency, and ensure high service availability through global acceleration.

"For the alliance, security is fundamental to maintaining the integrity of our network. Integrating with Alibaba Cloud ensures our users benefit from robust, multi-layered security technologies," said **Humayun Sheikh, CEO of Fetch.ai and chairman of the Artificial Superintelligence Alliance**. "This collaboration reinforces our commitment to developing a secure network infrastructure, safeguarding data assets and ensuring business continuity globally. We see immense potential in collaborating with Alibaba Cloud to push the boundaries of decentralized AI technologies. Their expertise and innovation in AI will be invaluable in our pursuit of advancing possibilities in the decentralized world."

This collaboration marks a significant milestone for ASI in its journey to advance web3 adoption and facilitate the development of decentralized AI technologies. By partnering with Alibaba Cloud as a global infrastructure provider ensuring access to high-quality, secure, and stable cloud infrastructure services. This move underscores ASI's commitment to delivering robust solutions for the future of digital innovation and plans to further develop within the APAC region.

QUOTE FROM ALIBABA

This marks the commencement of an ongoing collaboration between the Artificial Superintelligence Alliance and Alibaba Cloud, poised to forge new frontiers in technological innovation and advancement.

QUOTE FROM Cloudician

“As a professional Web3 infrastructure provider, We are excited to join the Fetch.AI as a validator to provide trusted validator services to ensure the security and stability of its network, As an important partner of Alibaba Cloud International in web3, we will actively participate in the Fetch.AI ecosystem together with Alibaba Cloud International in the future!” said **AlexFU ,Cofounder of Cloudician.**

About The Artificial Superintelligence Alliance

The Artificial Super Intelligence (ASI) Alliance is a collective formed by Fetch.ai, SingularityNET (SNET), and Ocean Protocol. As the largest open-sourced, independent entity in AI research and development, this alliance aims to accelerate the advancement of decentralized Artificial General Intelligence (AGI) and, ultimately, Artificial Superintelligence (ASI). For additional information on ASI, visit: superintelligence.io

About Fetch.ai

Fetch.ai, a Cambridge-based AI company, is redefining the possibilities of an intelligent and connected world through its AI agent-based technology. Fetch.ai's infrastructure technology enables developers and businesses to build, deploy & monetize through an agent-based modular platform for the new generation of AI applications. The company's core product, DeltaV, fuses Language Models (LLMs) and AI Agents to create an open and dynamic marketplace that connects users to services and reimagines the current search experience. For additional information visit: fetch.ai

About Alibaba Cloud

About Cloudician

Cloudician , the annual Web3 partner of Alibaba Cloud International North Asia Pacific Region. As a professional Web3 infrastructure provider and cloud service partner, Our commitment to providing excellent technology and services remains unwavering, and we are excited to bring more value to the Web3 ecosystem.
