

Math, Grade 9 – Bridge to De-streamed Science

SNC 1L0

This course is a Grade 9 elective Science course. It is the foundational Science preparation course for the Grade 9 De-streamed Science course (SNC 1W0). Students will develop their knowledge and skills to improve readiness for the Grade 9 Science (SNC 1W0) De-streamed Math course.

The selection of this course requires parent consultation through a Student Review Meeting (to be hosted by the child's home school), as well as Principal and Superintendent approval. These arrangements will be made by the home school, should a family decide to choose any Locally Developed course in grade 9.

Prerequisite: None
