Many students are finding that once you connect an Apple Pencil (Or another bluetooth stylus like logitech crayon), once it is disconnected they can still not write or draw in Notability. You have to disconnect it in the app. See steps below.

- 1. Open Notability
- 2. Open any Note
- 3. Go the three dots on the right hand side
- 4. Click on Info
- 5. A Options window will be visible- scroll all the way to the bottom
- 6. Click Disconnect Apple Pencil at the very bottom
