Formatting Guidelines

Columns: Articles should be formatted in a single-column layout. Text should be single-spaced unless a new section begins, in which case a single blank line should be added.

Title Positioning: The Thai title should be centered at the top of the page, followed by the English title on the next line. Author names and affiliations should be centered below the title in a single-column layout.

Headings and Subheadings: Align headings and subheadings to the left margin.

Equations: Equations should be numbered sequentially and aligned to the right margin. Leave one blank line before and after each equation. Example:

$$a = b + c \quad (1)$$

Tables must have captions above them, with formatting appropriate to the content. Example Table:

Citation Style (in English):

Use the Name-Year system for citations in the article, adhering to international standards. All citations in the article must also appear in the reference list. Examples:

(Buranaprattheprat, 2015)
(Buranaprattheprat, 2014, 2015)

Reference List Format (in English):

For each reference, leave a blank line between entries. Arrange references alphabetically by the last name of the first author, followed by the number of authors. If multiple authors share the same last name, sort them by the initials of their first and middle names in order. For works by the same author, list them chronologically by publication year, starting with the oldest and ending with the most recent.

If the reference is originally in Thai, translate it into English and indicate this by appending "(in Thai)" at the end of the reference. Examples:
