Conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions, conclusions. [Your conclusion should be the best part of your paper. A conclusion should: (1) restating the objective of this study, (2) tabulating the main findings, and (3) making recommendation for future works.]

References should be prepared according to the *Publication Manual of the American Psychological Association* (7th edition). This means in text citations should follow the author-date method whereby the author's last name and the year of publication for the source should appear in the text, for example, (Jones, 1998). The complete reference list should appear alphabetically by name at the end of the paper. [We encourage to use references from journals as the main source. The use of references from other journals will be send back to authors for revision or will be rejected before peer-review].

Note: Originality is very important aspect of a research paper. Take great care to avoid plagiarism in your writing and be sure that any text you pull from outside sources is properly quoted and noted in your list of references.

Note: A qualitative scientific paper is a description of an event, activity, observation, research or experience. The structure of a qualitative paper includes an abstract, introduction, methodology, results and discussion, and conclusions, and references.
