Abstract

This paper provides a template for preparing papers for electronic production of the *Absah: Journal of Islamic Law*. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 150 to 200 words in length. The abstract should be written in the past tense. Standard nomenclature should be used, and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article. If the article is written in Indonesian, then the abstract and keywords can simply be written in English, and vice versa.

Keywords

Keywords consist of a maximum of 5 words

INTRODUCTION

This section contains the background of the problem, general objectives, as well as a brief review of what should be and the factual conditions in the field. This section also describes relevant theoretical studies, both sourced from books and research results published in scientific journals. The entire article content is written using EB Garamond font, 12 pt with 1 spacing (Stevenson et al., 2020)/(Stevenson et al., 2020: p. 23). The text does not need to be page-numbered (Campbell & Rodriques, 2018)/(Campbell & Rodriques, 2018: p. 20).

METHOD

Contains how data is collected, data sources, and ways of data analysis.

RESULT AND DISCUSSION (if the conceptual idea is enough, DISCUSSION)

Results are the main part of scientific articles, containing: final results without data analysis process, and hypothesis testing results. Results can be presented with tables or graphs, to clarify the results verbally. Discussion is the most important part of the entire contents of scientific articles. The objectives of the discussion are: to answer research problems, interpret findings, integrate findings from research into existing sets of knowledge, and compose new theories or modify existing theories. If it contains tables or graphs, they must be referred to in discussing the research results. [Table 3](#).

CONCLUSION

Contains conclusions and suggestions. Conclusions include answers to research questions. Suggestions refer to the results of the study and take the form of practical actions, mentioning to whom and for what advice is intended. Written in essay form, not numerical form.

BIBLIOGRAPHY

The references consist of the author's name, year of publication, article title, city name, and publishing institution. The reference list is sorted according to the first letter of the author's name (A-Z). The second word in the name is agreed upon as a family name. Authors may follow the APA 5th Edition Publication Manual to write references. All references referred to in the text must be written in the reference list. Preferred references are articles taken from the latest journals/publications, no later than 5 years before article submission (paper submission). Example of how to write references:
