Gene ↔ CpG Search Tab

Search for eQTM associations by entering a gene or multiple genes, or a CpG probe ID or multiple CpG probe IDs, and filter by tissue/cohort if necessary. To test out a search query, click on the **Load Example** button.

Instructions:

1. Type or paste a **comma-separated list** of gene symbols (e.g., PDCD10, USP6) or CpG IDs (e.g., cg05575921, cg00119778) into the search box.
2. Choose whether your input is a **"Gene"** or a **"CpG"** using the selection options below.
3. (Optional) Use the **“Filter by Cohort”** or **“Filter by Tissue”** dropdowns to refine your search.
4. Click **Search** to populate a results table below the input box.
5. (Optional) Click **Download Results** to save the results output as a CSV file.
