To help keep track of the various websites and videos you look at while researching graphene, I've created this document.

Source	Information	Key Words	In your own words
Copy the URL or write book details.	Copy and paste the key relevant information.	List keywords in this box. Remember it is individual words, not sentences. This is to help you identify information later.	Take your key words and make new sentences. You can use this in your report.

Feel free to add more rows as needed.
