

Your Guide For Preparing an Industrial Feasibility Study

About Book's Author

Munther is an accomplished industrial expert with a deep understanding of industrial management, manufacturing processes, production management, working capital management, business strategies, and financial management. With over (34) years of experience in the industry, he has a proven track record of optimizing operations and driving efficiency in diverse industrial settings. Munther specializes in industrial management, feasibility studies, and strategies and has successfully led numerous projects resulting in significant cost savings, process improvements, and profit maximization.

Munther completed his master's degree in management at the Thunderbird School of Global Management (Thunderbird) in 1993 from the USA. He also holds the Investment Management Certificate (IMC) from the UK CFA Society and a Project Management Professional (PMP) license. He is a member of the Project Management Professional Institute and the Chartered Financial Institute CFA.

Munther began his career as an Industrial Researcher at the Gulf Organization for Industrial Consulting during 1986-1991; then, he was General Manager for manufacturing companies at the Qatar Industrial Manufacturing Company during 1993-2004. After then, he was the Projects and Investment Manager at the Qatar Foundation (QF) during 2004-2015, where he managed an investment endowment portfolio, managed the Qatar Business Incubation, and oversaw feasibility studies and many enterprise projects. Since 2016, Munther has been running his venture, the Grow Enterprise, from the UK, providing enterprise training and consultancy services.
