

Review Form – Systematic Review

Please review each item and mark the appropriate column with an 'X'. After completing the form, save it and upload it to the journal system.

Section	Item	Yes	Partially	No
Title / Abstract	Is the title clear and does it reflect the scope and type of the review?			
	Does the abstract adequately summarize the objective, methodology, main findings, and conclusion?			
Introduction	Does the introduction provide a clear rationale for the review?			
	Are the review objectives or research questions clearly stated?			
Literature Background / Theoretical Framework	Is the literature review appropriate and up to date?			
	Are the theoretical foundations or conceptual frameworks (if used) clearly described?			
Methodology	Is the methodology clearly described, including search strategy, databases, and time frame?			
	Are inclusion and exclusion criteria explicitly stated?			
	Is the selection and screening process (e.g., PRISMA flow diagram) appropriately documented?			
	Are the data extraction and quality assessment procedures clearly explained?			
Results and Analysis	Are the findings presented in a clear and structured manner (e.g., by themes, populations, outcomes)?			

	Are the number of studies included and their key characteristics clearly described?			
	Are tables, charts, or figures appropriately used to support the analysis?			
Discussion and Conclusions	Does the discussion appropriately interpret the results in the context of the research question?			
	Are the implications, strengths, and limitations of the review discussed?			
	Are conclusions supported by the results, and are suggestions for future research provided?			
Technical and Ethical Aspects	Is the manuscript professionally written, clearly organized, and grammatically correct?			
	Are ethical standards respected (e.g., plagiarism, transparency, citation integrity)?			

Comments to the authors:

Indicate what improvements authors should address and in which section of the manuscript.
