ANTI-AGING IV DRIP

Anti-Aging IV Drip

This nutritional drip contains anti-inflammatory components known to help improve skin elasticity and encourage hair/nail growth. When this IV drip is administered routinely,

some of the outcomes may include an improved complexion and additional support in wrinkles affiliated with aging.

With its antioxidants, minerals, amino acids and vitamins, the Anti-Aging IV Drip may be an option for naturally repairing skin cells and pigmentation.

For more information on Anti-Aging IV Drip, visit or call the clinic at:

Dr. Amauri Caversan ND
1200 Bay Street #1102
Toronto, Ontario M5R 2A5
