

Freezing my Promethean Screen: How can I use my computer while my students view a worksheet or my computer screen?

- Use the Freeze button on the panel
- The snowflake icon will also show on your panel screen
- The freeze button will freeze the image currently on screen

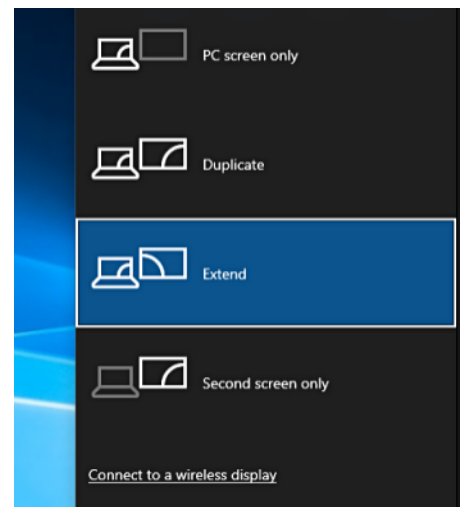

How can my students watch a video from my teacher's computer while I work on the same computer with Extend? Follow these steps to watch a video, you will need to extend your computer screen. **Touch features WILL NOT WORK WHEN EXTENDING.**

Click windows icon and the p on your computer's keyboard.

Choose extend and drag video to the right until you see it on the panel screen.

Duplicate – gives a source, shows what is currently on your computer screen.

Computer screen must be in Duplicate to view the same image on the computer's screen and Promethean Panel's Screen. **TOUCH WILL ONLY WORK WITH DUPLICATE MODE.**

If you have 2 computer monitors, Main computer monitor should be #1 duplicated to #3 Promethean Panel. Monitor #2 is your extended monitor where you drag items to work on without your students being able to view those items.
