EsP Narrative Report
SY 2022-2023

ESP or otherwise known as Edukasyon sa Pagpapakatao as a subject is heightened by the need to strengthen the moral fiber of society. It emphasizes social reform through the “inner transformation” of an individual. It touches the hearts of the students, not just their minds. Effective EsP makes the students realize that responsibility has a horizontal and vertical dimension he must reach out to his fellowmen.

As teachers of Fermin La Rosa National High School, we invite our students to join in the activity that is proposed by the Department of Education. “RBB – Retrospect Batang Batangueño” which is part of our activity in Edukasyon sa Pagpapakatao. These ESP projects aims to develop and master the ethical being of learners and guide them to seek the meaning of life, our roles in the society to help in building a community which uphold truth, freedom, justice, and love as well as to showcase the mastery of the five main macro skills in ESP: understanding, reflecting, consulting, deciding, and acting. This program is certainly having a good impact on the learners in terms of good values and right conduct, despite a new normal education where teaching and learning process takes place not in school or classroom but also in their homes.

Retrospect Batang Batangueno aims to build a value – oriented education culture through the inculcation of target values in everyday tasks of the learners. This project seeks the sense of practice until it becomes a part of habit and attitude of learners in the present times. This project also captures the significant time of remote teaching and schooling at home that the learners rekindle the true Batangueno values with the help and guidance of their own parents. Retrospect Batang Batangueno further aims to maximize Edukasyon sa Pagpapakatao learning beyond cognitive skills and competencies but hand in hand with the psychomotor and affective skills to be practiced in and out of their domiciles. Most specially, RBB aims to relive and re-instill to the learners the Filipino values by gradual practice through everyday chores or small deeds given as tasks or challenges. As it will eventually become part of their routines, it will become a habit and in the long run will become his manner and part of his behavior and attitude.
