ABSTRACT (Nunito 9 pt)

Abstract is a brief representation of the whole article which contains the context of the problem (background), the purpose of the research, the principal methods, the results and the major conclusion (contribution). An abstract is often presented separately from the article, so it must be able to stand alone. Thus, the reference must be avoided. Abstract must be written in Nunito , with no more than 300 words in one paragraph.

INTRODUCTION (Nunino, size 12, Center)

(Nunino, Size 11) The article begins with an explanation of the background, namely the reasons for the need to do research, supported by supporting references/literature. References are not allowed to use non-standard sources such as Wikipedia or blogs, etc. (Abdul, 2017). Editor (2018) requires that articles be original and not plagiarized by other people's work. Goals are written at the end of the background. The minimum number of references used is eight. Writing references and citations refers to the APA style.

The article begins with an explanation of the background, namely the reasons for the need to do research, supported by supporting references/literature. References are not allowed to use non-standard sources such as Wikipedia or blogs, etc. (Abdul, 2017). Editor (2018) requires that articles be original and not plagiarized by other people's work. Goals are written at the end of the background. The minimum number of references used is eight. Writing references and citations refers to the APA style.

METHODS (Nunino, size 12, Center)

(Nunino, Size 11) The research methods in a scientific journal encompass a range of essential aspects. These include the research design, which describes the type of research conducted; the population and sample explained in the context of the studied population and how the sample was selected; the instruments and data collection detailing the tools and techniques used to gather data; procedures that outline the steps in conducting the research; data analysis, involving statistical techniques and software used

Acknowledgment of research limitations; research ethics and subject consent; efforts to ensure the reproducibility of research results; information on references and data sources; statistical outcomes and data visualizations, as well as tables and figures that support research findings. This comprehensive information is crucial for understanding and evaluating the research reported in the journal.

Page Layout

Articles must be written on A4 size paper with dimensions of 210 mm wide and 297 mm long. Margins should be set at the following sizes:

- On : 2.54cm
- Lower : 2.54cm
- Left : 2.54cm
- Right: 2.54cm

Articles must be written in two columns with a single line spacing. Paragraphs are written justified left and right.The entire article must be written in Nunito font size 10pt. The title of the article is written in Nunito font size 12pt. The author's name is written in Nunito 10pt. Author affiliations are written in Nunito font size 8pt. Corresponding authors must include an email address.Article titles and abstracts must be written in one column (single column) and aligned left and right. Writing the author's name without including any title.

RESULTS AND DISCUSSION (Nunino, size 12, Center)

(Nunino, Size 11) The results and discussion can display data in the form of tables and images. Results must be supported by related references or can be compared with previous research.

The results and discussion can display data in the form of tables and images. Results must be supported by related references or can be compared with previous research.

Figures and Tables

Provisions for writing pictures and tables according to the rules of scientific writing.

Images can be displayed in the form of graphs, maps, photos, etc. and are made with high resolution. Images and tables can be made in 2 columns or 1 column. If written in 1 column, the location must be in the middle (centered). The image title is placed at the bottom of the image and written in Nunito 8pt font (Figure 1. Example of image format).

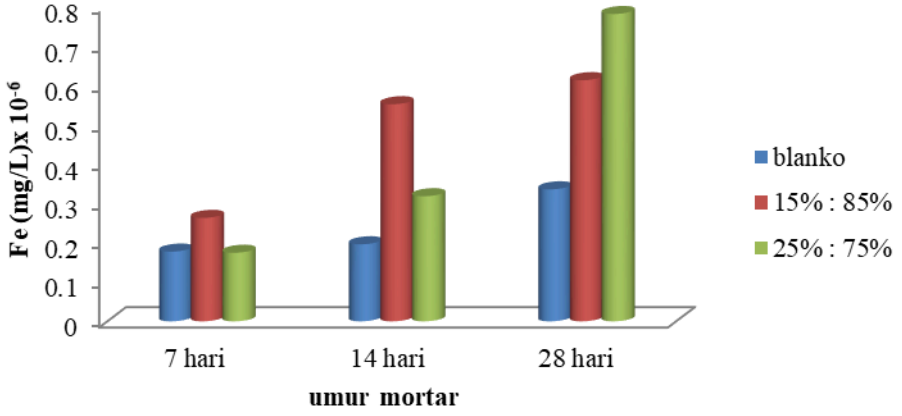

Figure 1. Example of 1 column image format (Nunito 11 pt)

Tables only use horizontal lines in the header and closing sections with a line thickness of 1 pt (Table 1. Example of table format). Table titles use Nunito 8pt font, while table contents use Nunito 8pt font. Information can be added at the bottom of the table with the provisions in the example Table 1.

Table 1. Example of 1 column table format (Nunito 11 pt)

Tool	Amount	Load units*	Total
Tool 1	5	10	50
Tool 2	3	2	6
Tool 3	6	5	30
Tool 4	2	4	8
			= 94

*) data source .....

Scientific Equations

The scientific equation is written in the center (centered) and the equation number is written on the right parallel to the equation as in the following example.

CONCLUSION (Nunino, size 12, Center)

Conclusions can be written in paragraph.
