

Taylor Y. Johnson is a Ph.D. Candidate at Virginia Polytechnic Institute and State University pursuing a Ph.D. in Engineering Education, where she serves as a graduate research assistant. Taylor earned her bachelor's degree from The University of Texas at Austin in Biomedical Engineering. Prior to beginning a research assistantship, Taylor served as a student support personnel for VT CEED, where she coordinated the engineering summer bridge program and served as an instructor for the first-year professional development seminar for women in engineering. Her research and professional interests include exploring experiences of engineering students who work, the impacts of social class in engineering education, and student support for low-income students in engineering.
