

Aryan P & James F

The goal of this learning module is to learn how to solder correctly and safely. The group consists of Ari Pand Jimmy F. The first step will be to watch the safety video completely to understand the process of soldering. After both members understand the process, we will attempt to move through the kit provided by Mr. Detrick. The resources used will be the online video suggested by Mr. Detrick, the aforementioned kit, and solderer itself. The main role for each member of this group is to learn and understand how to solder. However, more specifically, since Ari already knows how to solder he will most likely be teaching Jimmy how to solder and make sure Jimmy does not screw up ridiculously. Jimmy's main responsibility will be to finish this write-up and most likely do most of the daily logs, and also watch and learn from the resources provided.
