

Gaming & YouTube Edits

This folder includes gaming and YouTube-style edits I have created for personal content and sample portfolio work.

These edits focus on turning raw gameplay into cleaner, more watchable, and more entertaining videos. The editing includes cutting out dead space, keeping the best moments, adding captions, adding music, cleaning up audio, reducing background noise, adding memes, and improving the overall pacing of the video.

This type of editing is best for gaming creators, YouTubers, streamers, highlight reels, funny moments, short clips, montage-style videos, and social media content.

What This Style Includes

Simple cuts

Highlight selection

Captions

Music

Audio cleanup

Noise reduction

Basic transitions

Intro and outro trimming

Short-form pacing

Lofi-style edits

Meme captions

Gaming comedy edits

Music-based pacing

Final export for YouTube, TikTok, Instagram, or Shorts

Best For

Gaming highlights

YouTube videos

YouTube Shorts

TikToks and Reels

Stream clips

Funny moments

Montages

Lofi gaming edits

Meme-style gaming videos

Personal creator content

Style Note

Every edit depends on what the client wants. Some videos may need a simple and clean highlight style, while others may need captions, memes, music, faster pacing, or a more entertaining feel.

The final style is based on the purpose of the video, the type of footage, the platform it will be posted on, and the client's overall vision. Reference videos are helpful because they show the style, pacing, and mood the client wants.

Text style, font choices, caption colors, music, memes, and overall pacing can be adjusted based on the client's preferences or suggestions. The goal is to make the video feel polished while still matching the client's vision.

Editing Focus

The main focus of these edits is to make the video feel cleaner, smoother, and easier to watch. Depending on the style, the edit can be simple and highlight-focused, or more entertaining with captions, music, memes, and personality.

The goal is to improve the flow, keep the strongest moments, and make the content more engaging for viewers while still matching the client's vision.
