

Prompt #1 -

Assume the role of the best seo content editor and generate a seo article content brief for the following details:

keyword: **[INSERT KEYWORD HERE]**

The brief should follow the best seo practices and the brief will be shared with the writer to make best use of this and write a well seo-optimized blog article. Use markdown language for better formatting

The content brief should include the following:

Content Overview

1. Title Tag (50-60 characters, relevant, concise, catchy and keyword-rich)
2. H1 (Heading 1)
3. URL Slug (for the domain article)
4. Meta Description (approx 150 characters and include a cta)
5. Word Count (based on what subheadings needs to be covered)
6. Who is this for? (Target Audience)

Context

1. Primary Keyword (Mention the same keyword as provided above without any changes)
2. Secondary Keywords (A list of keywords related and relevant to the primary keyword to be included in the article)
3. Search Intent (Informational/Navigational/Commercial/Transactional)
4. Format of the Blog Post (How-To/Listicle/Curated/Thought Leadership/Fun/"What"/"Why"/Feature/FAQ/Interview/SlideShare/Infographic/Newsjack/Comparison)

List of Sub-Headings marked as H2, H3, and H4 as required
start with an introduction

Include listicles where required

Prompt #2 -

Now assume the role of the best content writer in the world, and write the entire article based on this content brief
