HSO

SL: Sitting there in disbelief, it was finally true

This moment only comes once in a lifetime and it is not guaranteed for everyone.

I finally finished my taxes and it's official... I lived up to my true potential and I'm now a self made millionaire.

Not too long ago I was working myself past exhaustion, but it did not matter. The bills were piling up and collection agencies were calling.

No end in sight.

No hope

No time

No idea on how to get out from behind this 8-ball of growing debt and stress.

The only thing to look forward to was those extra work shifts being offered that week.

I wished, begged, and prayed for a chance, an opportunity, a way out of this merciless loop that I was stuck in.

Then I saw the light.

Now I'm faced with new problems like owing more in taxes because I make too much money.

I happily take this problem over any of the ones I have faced before.

I am the person I was destined to be, my own boss, more successful than any of my peers, and looking forward to the wonderful opportunities each day brings.

My journey began with one simple step and that was Jason Capital's book, F*ck Jobs.

Find out how to be your own boss and the next person to thank Jason Capital on their new found success.

P.S. You are now able to get an easier start on becoming your own boss than I did. F*ck Jobs ebook is now being offered for free. Enter your email, then check your inbox and get to work!
