

[Progressions Here](#) Print and put in planning book so we can use it as a prop in agency.

	<b><u>Monday</u></b>
Hot Spots/Daily Basics/Maths Eyes	Message from Head Agent - welcome back, watch out for head villain, he is upgrading the brains of his villains as we speak  Doubles, doubles
Song/Game	Playing cards...pick a card, make a set of that number, in pairs, lead agents rove focus on making set with accuracy. Extension for those that are able to...have two cards and add them together, recording the number story.
Professional Development Activity	Professor - Number bonds...make a group and split it into two....two lead agents rove and take specific groups as needed
Client	<b><u>Teacher in role...</u></b> Astronaut - help, I had collected eleven moon rocks in my bucket, I fell over and seven tipped out...how many are left in my bucket
Villain	- Subtraction Shark
Word Problem	As above, eleven moon rocks, seven tipped out, how many left ?
Talk move focus	Cowgirl calculation - focus on how do you know? Do you agree, disagree...
Strand Link	None today
Reflection Handwrite	Worked really well to have Laura and Amy sitting with a specified group to scaffold their problem solving. Children love the idea of the board being 'alive' Number bonds activity works really well, short and sharp and effective
Where to next? Handwrite	

	<b>Tuesday -</b>
Hot Spots/Daily Basics/Maths Eyes	<p>Maths eyes - Flower button picture - what can you see, what do you notice?</p> <p>Message from head villain - the problems my villains pose will get harder...I have given all of their brains an upgrade. Agent 81 is in imminent danger</p>
Song/Game	<p>How many in the jar?</p> <p>Friends to ten</p>
Professional Development Activity	<p><b><u>Wizard as professor</u></b>  <b><u>Continue with number bonds work - two lead agents to rove and support as needed</u></b></p>
Client	<p><b><u>Teacher in role...</u></b>  Client - The Gardener</p> <p>The petals on my flowers keep increasing.</p>
Villain	Knight Adder
Word Problem	The gardener has three flowers in her garden. Each flower has six petals. How many petals are there altogether if we add them up
Talk move focus	Cowgirl calculation - focus on describing how you solved the problem
Strand Link	Shape
Reflection Handwrite	Altered math eye to do shapes with popsicle sticks, this worked really well and led beautifully into discussions about grouping.
Where to next? Handwrite	Repeat a groups of activity next week. Manassah struggled because he did not want to use equipment.

	<b><u>Thursday -</u></b>
Hot Spots/Daily Basics/Maths Eyes	How many now...use groupings to help us. Group those in jar first, then focus on counting on.
Song/Game	Friends to ten, doubles doubles
Professional Development Activity	Using two dice, in groups of three, roll dice, write the how many shown altogether by the dice. For a more basic activity, simply write the amount shown on the dice.
Client	<b><u>The Teacher</u></b> <b><u>Help, I made 20 muffins for my class, some have disappeared and now I have 15 left, but I don't know how many were taken.</u></b>
Villain	Wacky Witch -
Word Problem	The teacher is in trouble. Solve this problem. The teacher had 13 muffins, I took some away and now she has 3, how many did I take? -
Talk move focus	Cowgirl - agree, disagree, how do you know?
Strand Link	
Reflection  Handwrite	
Where to next?  Handwrite
