ABSTRACT (Times New Roman 10pt)

The abstract is a concise summary of the manuscript designed to help readers quickly determine the main research problem, the method used to address the problems encountered, the research objectives, and preliminary research results, which can be presented as numbers or percentages, as needed. The abstract should be clear and informative, describing the problem under study. Abstract length: 170-230 words. The abstract lacks citations or references. Avoid unusual abbreviations and define all symbols used in the abstract. Keywords related to the research topic are recommended.

Keywords:

First Keyword, Second Keyword, Third Keyword, Fourth Keyword,
Fifth Keyword (Min 5 keywords, Max 5 keywords) (Times New Roman 10pt)

Corresponding Author:

Name of Corresponding Author,

Faculty, Study Program, Name of Institution, City, Country

Address Institution

1. INTRODUCTION

(SUBTITLE Center, Bold, Times New Roman 13, UPPER CASE, After 6 pt, Before 18 pt)

Articles are formatted as one-column pages with an A4 paper size. For a Top Margin of 3 cm, a Left Margin of 3 cm, a Bottom Margin of 1.5 cm, and a Right Margin of 1.5 cm. Manuscripts should be created using Microsoft Word, with single spacing, 10-point Times New Roman font, and a maximum of 10-13 pages.

Please select the article title (maximum 14 words) that uses the fewest possible words to describe the content adequately. In the title, avoid using the word 'design,' as it suggests the problems and application methods discussed in the discussion chapter. The introduction must describe the background of the research, including the State of the art and related or similar research (at least 5), and state the differences between your research and these studies. In the introduction, the solution or objective of the research should be clearly stated. If an article includes a citation, it should be formatted using [1], [2], and so on, as generated by the Mendeley citation tool in IEEE format. Terms in foreign languages are written in italics. In the first paragraph, describe the research problem in detail, providing a concise paragraph description. Also, describe what is expected to be a solution to the problem in your research. Next, describe related research similar to your own (at least 5) with an update from 5 years ago, so that this related research can inform

a Gap Analysis of the research you are conducting. At the end of the introduction, describe your research objectives and what you hope to achieve from your research.

It is recommended that the author follow the following article structure: INTRODUCTION (minimum 700 words), RESEARCH METHODOLOGY (minimum 500 words), RESULTS AND DISCUSSION (minimum 1800 words), CONCLUSION (minimum 200 words). Maximum article length: 10-15 pages.

2. RESEARCH METHODOLOGY

2.1 Research Stages (Subtitle Times New Roman 10, Left, After 6 pt)

Contains an explanation of the research stages (MANDATORY IN THE ARTICLE), which describes the research sequence, including how the stages of applying the method and testing methods align with the expectations and description of the study. It is preferable to include pictures and tables, which should be accompanied by the names of the tables and figures, along with serial numbers.

2.2 Sub Title 2 (After 6 pt, Before 6 pt)

Subtitle 2 can also include problem-solving methods and the stages of the process. In the manuscript, citation numbers are sequentially listed in square brackets [3], as well as a table of numbers and a sequence of numbers, as shown in Table 1 and Figure 1.

Table 1. Types of databases (After 6 pt, Before 6 pt)

Name	Number	Field
MySQL	10	100
Oracle	15	130
Access	20	400

Table 2. Fields of databases (After 6 pt, Before 6 pt)

Fields	Table	Databases
Record 1	Table 1	Db ms 1
	Table 2	Db ms 1
Record 2	Table 1	Db ms 1
	Table 2	Db ms 1

(The title of the table is centered, there are no vertical lines, and it is forbidden to write TABLE as a PICTURE)

For Tables 1, 2, or Figure 1, the numbering must be linked in the explanation, and a specific explanation is given.

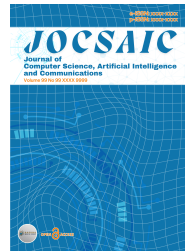

Figure 1. JOCSAIC Logo

Use high-quality 300px images that look very clear, explain the images used, and relate the numbering. Formulas are created using the Formula Editor (EQUATION) found in Microsoft Word. The formulas are numbered sequentially based on the order of the formulas contained in the article, and the writing is as in numbers 1 and 2.

$$\int_0^{\infty} \int_{j_i} \exp \quad (1)$$

$$\int_0^{\infty} \int_{j_i}^{-1} \int_{120_i} \exp \quad (2)$$

3. RESULT AND DISCUSSION

This section presents the results and discusses the research topic, focusing on the method's application. This can be achieved by simply presenting the existing data from the study. This section also includes explanations in various forms, such as text, pictures, tables, and others. The minimum number of words in this section is approximately 1,800.

3.1 Subtitle 1

- a. Use lowercase and alphabetical letters for list numbering.
- b. Setting 5 mm for the left protrudes in.
- c. If more than 1 level of numbering is used for the following list:
 1. Use numbering.
 2. Next list

3.1.1 Subtitle 2

(For a numbered list, use a, b, c, and so on)

3.2 Application Implementation (if any)

Contains the results of application implementation, program results (which are essential only), or results from method testing.

3.3 Discussion

Contains the results of the discussion and can be compared with the results of previous studies.

4. CONCLUSIONS

This section presents conclusions that address all the issues raised in the research. In conclusion, the study's limitations can be identified to inform future research and facilitate improvements. The contents of the conclusion are not presented in the form of points but in paragraphs. The number of words in this section ranges from a **minimum of 200 words**

REFERENCES (After 6 pt, Before 6 pt)

(Times New Roman, 10)

All references and citations cited in this article are **MUST** have in the **CONTENT OF THE ARTICLE** and Must use reference tools such as MENDELEY/ZOTERO/ENDNOTE in IEEE format, 80% of the **PRIMARY** literature (journals, proceedings, research reports, patents, standards, historical documents, research books with update 5 years) and 20% **SECONDARY** literature (**minimum two books**, trustworthy websites) within at least the last 8 years.

The minimum number of references used is 20.

(Remove any additional **BLUE** information like this in your submission script.)
