UNIT 3 GENRE PROJECT

<https://youtu.be/qDFfsE18814>

Before I started

Before I started this project I expected it to be hard because I didn't know what genre I would pick to finish this project and would get the point across .The choice I used was to make a YouTube video putting clips from other videos into one . I was excited about actually making a YouTube video for my first time.

Getting it done

What I had to do at first I had to find different clips which could help get my message across because I couldn't use the original film I wanted to show due to a difficulty. I texted with a high school friend of mine on how he edits his own YouTube videos since he had a blog and he referred to me YouTube to MP4 player which allows YouTube videos to be downloaded on to the laptop which I then was able to edit which time frames I needed, and I was able to combine the two videos perfectly.

Now that it's done

I feel proud of what I have made because ever since I was a child I always had a curiosity for how people made YouTube videos and what was the actual process .And for my first time making a YouTube video I would say I did pretty good. It also gave me some insight in to how much dedication and time and effort YouTube's put into their videos and how stressful it can be especially for the people who use this platform as their main source of income
