

Nolte's Locks and Bolts

(from the 1992 Fantasy Collector Card #395)

Like Skie 's locks and bolts, this device looks like a small, ornate lock with a tiny silver key. Like the original, when the key on this device is turned clockwise, all portals within 50 feet slam shut and become *wizard locked* (12th level). When the key is twisted counterclockwise, the effect is reversed. Nolle added another feature, though; when the device is twisted counterclockwise within 6 inches of a non-magical lock, there is a 70% possibility that the lock just pops open. Non-magical traps can be similarly bypassed.
