How to play LDR Patch:

To play my patch all you need to do is select the patch in the Tango menu. After that you’ll need to create a save within tango as this creates a special save which is needed to have access to all the chips added and to not get an error. After you have created the save you can load up and start playing my patch. If you run into any issues feel free to DM me on discord @ldr100. A few screenshots below may help!

How to get a Link Navi Save file:

As these saves cannot be generated in Tango, please download the savefile from my Google Drive. The link is HERE!

How to Enter:

You can submit builds via this link here!

How to find your opponent:

Upon joining my discord go to the rules and react to the emotes for MMBN (and MMBN Matchmaking if you want to be alerted for matchmaking) which is needed to go into the MMBN channel. After, you will be added to a thread in which matches can be organised and played. Discord link: https://discord.gg/Pkmr9Qq
