Abstract (Cambria 12pt Bold)

The abstract should be written in a single paragraph, approximately 200–250 words in length. It should not contain quotations, tables, figures, footnotes, or excessively detailed discussion. The language used should be academic, straightforward, and to the point. The abstract should accurately reflect the content of the article. Authors should not make claims that go beyond the research data and methods. For example, qualitative research or case studies should not use claims such as "proves an effect" unless the research design truly allows for causal evidence. (Cambria 12pt)

Keywords: *Mention key concepts, 3-5 words, written in italics.*

The literature review presents an analysis of scientific sources on a specific topic in the last ten years that correspond to the research topic. Present the issues and actual scientific debates critically in the research topic and determine the existing research's research position. Review literature can be arranged chronologically, thematically, methodologically, and or theoretically. (Cambria 12pt)

4. Result (Cambria 14pt Bold)

The results section presents a description of the research data. Writing source literature uses body notes in the format of the American Psychological Association (APA) Style. (Cambria 12pt)

4.1 Tables and Figures (Cambria 12pt Bold)

All tables and images that you enter in the document must be adjusted to the order of 1 column or the full size of one paper to make it easier for the reviewer to see the meaning of the image. The table must be given numbering and title name, for example, Table 1—the Title Name. Examples of table formats are as follows: (Cambria 12pt)

Table 1. r Value

No.	Item	r value
1.	1a	0,8
2.	2a	0,7
3.	3a	0,75

As with tables, images must also be numbered, for example, Figure 1. Image Caption. The image number and caption are placed in the center of the image, (Cambria 12pt)

Figure 1 Graph of FDR in East Java – February 2021 (Cambria 10pt)
