IVORY COAST COMMUNITY MEETUP

Contents

1. **Fondamentale information**

We organize a community meetup Côte d'Ivoire:

- to in order to resolve certain conflicts of Leadership,
-try to activate certain inactive Reps,
- exposing the difficulties of each plan activities to come together and to advance the community
-Have more impact in the next six months.
-It is also an opportunity to meet some key contributors around a working session to supervise the volunteering process to Mozilla.

Transportation

To reduce expenses, transportation costs are not included in this budget.

However, trains will be available for participants who wish to take part and will be charged
    transportation costs.

    Exception: Transportation fees about event organization are including in this budget.

5 Who will be there?

Participants must confirm their attendance here (25 Participants only)

6 List of rooms and feature

Number of nights: 1
Number of rooms: 14
King bed
Two occupants per room

    NB: For those who want a single room, you will have to pay additional charges. If you want
    to stay longer, Mozilla will not take into account extended stays, it will be your own expense.
    Thank you!

    7 Goals

Goal 1: Translation, 5000 string

Manager project Lead MDN Côte d'Ivoire: Brice TOUKPO

All people (25 peoples) Help translate 5000 String on MDN.

Goal 2: For the next two month (Mai, June), all people that choose session 1 hold working sessions to develop add-on..

Goal 3: Two month later (July), finalization and submission of the add-on.

Goal 4: In the next six month, all people that choose session 2, hold working sessions for finalization SUMO project Firefox in Nouchi (translation FireFox to Nouchi, Ivorian Jargon).

REPS REVIEWS 1:

Question 1: Critical:
   ● Could you please explain what you mean by "Leadership conflicts"?

Answer:
It there's some conflicts between community members and this is in part due to Bacely Yorobi. When he and Brian Hui came back from Kenya in May 2015, they were made us believe that this community Meetup Representative for Kenya, will be those who will lead Mozilla Africa.

Therefore, it is they who will decide the future of the Mozilla community in Ivory Coast.

Brian and Bacely to able to appropriate the work of others, made us believe that all initiatives and project members of the community will go through them for approval.

In summary, community management by ancient Reps Lead who attributed the merits of others did go in the shade committed and passionate contributors of Mozilla.

In short, I wish I could bring them together to make them see the opportunity that have been hidden from them and how to start on a new basis.

It is also an opportunity to do an update of what has happened during the last three months in mozilla (Connected Devices, Campus Campaign, Leadership summit).

How measure metrics?

   1) Translation of 5000 string on MDN (Coordination to Jean Yves Perrier with Brice TOUKPO on string will be translate).
   2) In the next two month, AKA BROU, PHILIPPE KOUADIO, SAINT CYR hold workshop for develop add-on and run Add-on for sumission.

3) In the next six month, finilization of SUMO project, Firefox in Nouchi. (ABBACKAR DIOMANDE and Nash CI)
4) For next tree month, 500 new FSA, help take back the web.
5) The FSA cub Team will face the next challenge:
-Make A video in which they will present their teams and their schools describe their motivation, their action plan for awareness regarding the protection of data on the web during the three (3) next month.

6) Recognition: The best community builder will have Mozilla gadgets, obtain sponsorships, possibility to attend the next Local community Meetup, getting a leadership position in the Mozilla community CI (make from the dream team of Ivory Coast FSA).

REPS REVIEW 2:

- Day 1 looks good to me
- Critical: Could you please add goals for the sessions on Day 2 and 3?
  - That should be something in the format of "After the Firefox Add-ons session, we want at least 3 persons that have the knowledge to run a add-on workshop on their own in the next 2 months"

Answer: See schredule and metric measure.
  - Training is nice, but we need goals for it, otherwise we can't approve that
  - Feel free to text me if you have questions regarding that, I can gladly help out :)
- For Day 2, do you really need that many different topics? Would it make sense to focus on one or two?

Answer: See schredule

Proposal schedule (Michael)

Day 1: ok

Day 2:

Firefox OS / Connected Devices update -- everybody	
Add-on session	l10n session
	SUMO session
Hackathon for the developers	

Like that people can join either track and choose what they care most about. If you document it correctly, people can read about the other sessions later and jump into any discussions as well.
