Dr Rachel Jenner

Consultant in Paediatric Emergency Medicine

Project: The Greater Manchester Violence Reduction Unit is a multi-disciplinary multi-agency team including health representatives from Emergency Medicine and Public Health, police, education, local community, police, and probation services with academic links with Manchester Metropolitan University Big Data Centre and Liverpool John Moores University Trauma Intelligence and Injury Group. The aim is to reduce serious violent crime in Greater Manchester, with a particular focus on knife crime in young people, using a public health approach. The exact project will be determined with the academic foundation trainee depending on their interests and the needs of the VRU at the

Medical Leadership Projects

time, but current examples include – evaluation of hospital navigators, comparison of violent assault health data from different sources, evidence review of Street Doctors programme.

Suitable for someone with an interest in major trauma / emergency medicine / public health.
Leadership and quality improvement experience gained with membership of GM VRU Health and Wellbeing Group and project delivery.

Opportunity to do clinical work if desired in Paediatric or Adult ED to maintain banding.
