

As mentioned in my post, I'm taking over my father's failed trading business mainly dealing with natural resources and equipment for the military.

The company is called "Quantum Sungam" also known as QSI. I'm very open to any design but would prefer a modern aesthetic. I would love the design to portray a sense of credibility, stability, and be easily recognizable.

Would love 2 logos where one includes QSI and another which includes "Quantum Sungam". Quantum Sungam looks better in all lowercase to me but my eye for design is not that great. But do please feel free to use your creativity as you seem fit. Thank you in advance! - David
