

Andrew Ichihara

Full Stack Developer

Vancouver, Canada, 236-785-9611, geek.yuto@gmail.com, [LinkedIn](#), [Github](#)

Summary

Full Stack Developer with a focus on Frontend and 4 years of experience specializing in TypeScript, Vue, and React. Skilled in creating user-friendly, readable, and scalable code. I mentor developers and promote coding best practices. Additionally, I work on side projects, continuously learn new technologies through platforms like Udemy, and share my knowledge with co-workers.

Skills

Languages & Frameworks: TypeScript, JavaScript, Python, Node.js, ReactJS, FastAPI, NextJS, Vue, Tailwind CSS,

Django, React Native

Database: MongoDB, PostgreSQL, DynamoDB

Others: Jest, Zustand, testing-library, CI/CD, Figma, Agile, Github, AWS, Google Cloud, Docker, Expo, UI/UX

Experience

Frontend developer

Oct 2024 -

SOZO, Vancouver, Canada

- Developed a real-time chat application from scratch. Designed the UI/UX using Figma. Currently implementing the frontend for both web and native applications.
- Due to the small team size, I proactively proposed better implementation methods, site maps, and design improvements to enhance the overall quality of the product.

Frontend developer

Apr 2024 - Aug 2024

Acall.inc, Singapore

- Delivered the front-end for an AI chatbot managing meeting room reservations, improving user engagement by enhancing the UX based on direct feedback from product managers and designers.
- Increased team efficiency by JSDoc comments, promoting team-wide adoption, and fostering code clarity.
- Resolved critical frontend issues through code reviews, ensuring the timely delivery of high-quality features.

Frontend, Fullstack Engineer / Project Manager

Aug 2022 - Mar 2024

Iret.inc, Japan

- Led frontend development for large-scale enterprise systems, often making the fundamental decisions. Collaborated closely with designers and infrastructure teams.
- Took the initiative to self-learn technologies when needed for the project, sharing knowledge with the team and ensuring smooth project progress.
- Led a team of 4 developers, doing project management and code reviews while coordinating with clients.
- Spearheaded the migration of a web app from Vue2 to Vue3, providing regular progress updates to reassure the client. Improved code readability by restructuring functions and components for better maintainability.

Software Engineer

Jul 2020 - Jul 2022

Arara, Japan

- Developed 10 pages front-end UI features, issues with designers and other developers.

- Automated testing for a payment card API, initially leveraging PostMan, then transitioning to Shell Script to eliminate environmental discrepancies, achieving a 99% reduction in testing time.
