Today's job of the day is a great way through which you can make up to 800 bucks per week using Quora.

How?

We are currently working with 3 large e-commerce brands that use Quora as their marketing platform.

They post content related to their niche and then promote their product at the end of it.

But they can't be able to manage all of it by themselves, that's why they're hiring ordinary people from your country to manage it on behalf of them.

If you have a reliable internet connection, a smartphone or tablet, and just 10-12 hours of free time each week,

Then you're already qualified for this simple remote job.

### Body:

Hi {!firstname\_fix}

We're looking for someone to fill a job role testing and reviewing crossword apps and all kinds of other word, number and puzzle games on their phone or tablet. So, do you like relaxing on a Sunday afternoon with a crossword puzzle? Then this job could be right up your street - and it pays very well too. Here are the details...

**Job title:** Pocket hundreds of dollars every day testing and reviewing crossword and other word, number and puzzle apps on your phone or tablet

**Job description:** Crosswords, sudoku, match-3: there are a lot of old-school word, number and puzzle games that have been adapted to the digital world via apps. And the small companies creating these apps need some eagle-eyed remote workers to take their new apps for a spin and give them feedback. Don't worry, you don't need to be a genius crossword player, you just need to spot bugs and give honest feedback on your experience using their apps.

**Pay:** \$30 an hour (minimum \$120 a day)

Click here to apply for the position now.

**Location:** As this is an online position, it's open to people from your country, so you already qualify on that front!

**Requirements:** You'll need to meet the standard requirements for online work. Namely, a smartphone or tablet, an internet connection and a minimum of 4 available hours each week to do the work. The hours are flexible, so it's up to you when and how much time you put in, but 4 hours a week is the minimum. You could do 4 hours a day if you like (or more), which will net you about \$120 a day.

**Necessary experience:** As I say, you don't need to be a crossword genius or anything like that. This is mainly about testing the usability of the apps, so checking whether there are any bugs, if they run smoothly or lag, that kind of thing. So the only experience you need is a keen eye and the enthusiasm to help small companies improve their apps. We'll provide you with full training on the best way to write up your reviews.

Most people see crosswords and other word, number and puzzle games as a good way to pass a lazy afternoon. And they are.

But what if you could receive a little extra cash while you do it?

If that appeals to you, then I say get your name down for this position.

Well-paid remote jobs like this get snapped up quickly.

### Body:

Hi {!firstname\_fix}

Would you like to get smarter? And would you like to receive money at the same time? If you're nodding YES to both of those questions, then you're going to love today's job offering... this is your chance to earn some extra capital by testing and reviewing brain training apps like Memorando!

**Job title:** Get smarter and earn extra bucks testing and reviewing brain training apps like Memorando on your tablet or phone

**Job description:** Studies have shown that brain training can improve working memory and increase intelligence. And we're looking for 5 people to put the best brain training apps, like Memorando, out there to the test. You just need to download and play around with the apps and then write up your opinions on your experience. You'll make some extra cash and, who knows, you could even get smarter in the process!

**Pay:** \$30 an hour (\$210 a day)

Go to the link below to apply for this creative job now!!

**Location:** We're looking for people from all countries for this one. So, you fit the bill.

**Requirements:** Do you have a brain? Are you ready to watch it get smarter? Then you're good to go! In all seriousness, all you need is a tablet or phone, an internet connection and 7 hours available each week to test these apps out.

**Experience:** This isn't brain surgery. You don't need to know anything about the way the brain works or anything like that. It's all about playing games developed by neuroscientists and seeing if they make you feel smarter. You'll also need to keep note of the functionality of the apps, but if

you've downloaded and used an app before, you'll have all the experience necessary for that. We'll be providing you with training on how to write good reviews.

So, can you feel your brain growing at the thought of testing these brain training apps?

I hope so, because this could really be a fun job!

In fact, I think for that reason it won't be available for long.

I've just sent this message out to tens of thousands of remote job hunters.

So, if you want this job, click here and apply before someone else does!

Hi {!firstname\_fix}

What's your favorite book? Harry Potter? Fifty Shades of Gray? A Prayer for Owen Meany? The Football Outsiders Almanac? Whatever it is, what if I told you you could receive a fat daily paycheck for rereading your favorite books and reading new books? Because that's exactly what today's job offers...

**Job title:** Receive a daily paycheck for testing and reviewing reading apps like the Kindle app on your mobile or tablet

**Job description:** Whether you read every book in the charts or you have a single favorite you return to again and again, you could be right for the reading app tester and reviewer job space we're looking to fill today. Thanks to the rise of tablets and smartphones, reading apps like Kindle's app and Whatpadd are hugely popular and we're looking for five people to test and write online reviews for these apps. You don't need to read books all the way through, just take notes of your general experience and write that up into a short review.

**Pay:** \$30 (\$300 per day)

Friend, you can click here to apply now.

**Location:** This is a remote job, so we're considering people from all countries. That said, we're mostly interested in reviewing reading apps that focus on books written in English, so you'll need a firm grasp of the language.

**Requirements:** As mentioned above, a grasp of the English language will be beneficial! Apart from that, a phone or tablet to test the apps on (and write your reviews on), an internet

connection and an enthusiasm for books wouldn't go amiss either! The job has flexible hours, up to 10 a day (which could pay around \$300).

**Experience necessary:** We'd love it if you are the world's keenest reader *and* have experience reading books on your tablet or phone. But really that experience isn't necessary, it's just a bonus. What we really need is someone who's comfortable dedicating a few hours a day to thoroughly testing these reading apps and relating their honest experience, good or bad.

Do you tick all the boxes above?

If not then no worries, I'm sure I'll be in touch with a job more up your street soon.

But if you've read the above and you're hungry to get started, I recommend you get ahead of the crowd and [click here to apply now](#).

How does popping in your headphones and receiving a big paycheck to listen to music sound? Pretty good, I bet. Well, you'll want to apply for today's available job ASAP because we're looking for one remote worker to test and review music apps like Spotify. Here's the specifics...

**Job title:** Earn \$20 an hour testing and reviewing music apps like Spotify

**Job description:** This job role is pretty self explanatory! Subscription music apps like Spotify have completely revolutionized the music industry, taking everything into the digital world. But they're still far from perfect! That's why small companies developing music apps are looking for testers to give them feedback on their apps. It doesn't matter if you listen to Beethoven or Lady Gaga, you can still qualify for this position.

**Pay:** \$20 an hour

Hit the link below to apply right now!

**Location:** Well, where can you listen to music via your headphones? Anywhere is the answer! And that's why there are no restrictions on the location of applicants to this job.

**Requirements:** You need a smartphone or tablet, internet connection and a pair of headphones if you want to test these apps in a public place and not annoy people! Many of the music apps have different tiers of subscription, so you don't need to pay to test most of them out. You will need 5 hours a week to dedicate to this role, but you can split those hours across the days however you like. That's the beauty of remote work like this!

**Necessary experience:** Sure, if you're an audiophile who has their headphones jammed in their ears all day every day, this job will probably fit you better than someone who doesn't know a CD from a toaster. But the truth is anybody who can download an app can apply to this job. You will be given all the training you need to test and review these music apps to a standard the app developers will be happy with.

This job is one of the hottest we've ever had available. In fact, I wouldn't be surprised if it's already been snapped up.

I mean, who doesn't want to listen to music and receive an extra paycheck for it?

Hi {!firstname\_fix}

We are currently seeking to hire new web reporters to write product reviews. You will play a vital role by providing valuable insights, opinions, and experiences about a product or service to potential buyers. Your primary objective is to help consumers make informed decisions before purchasing.

By fulfilling these responsibilities, you will contribute significantly to the consumer decision-making process, ultimately helping buyers make well-informed purchasing choices.

### **What You Will Be Doing**

Our reporters thoroughly research a product, gathering information about its features, specifications, pricing, and target audience. This helps them develop a comprehensive understanding of the product, which is crucial for writing an insightful review.

Reporters test the product or service themselves, using it as an average consumer would. This hands-on experience enables them to provide an accurate assessment of its performance, quality, and user experience.

They then present their findings and opinions in a well-structured, engaging, and informative manner. They highlight the pros and cons of the product, any issues or concerns they encountered, and their overall satisfaction with the item or service.
