

CUSTOM KICK PLATE AND PUSH PLATES ONLY- BRASS MATERIAL FINISH OPTIONS

Aged Brass
A solid brass sheet polished then hand burnished to give the effect of a vintage brass product. The finish is protected by a beeswax finish to preserve the finish. The aged brass is known as a 'living finish,' so over time, it will naturally evolve.

Antique Brass PVD
A mellowed brass patina featuring dark and golden undertones that looks elegantly aged. The material is very strong due to its stainless steel core. Unlike traditional brass, it will not tarnish over time.

Brass Aluminum
A matt gold finish, which is similar to brass and PVD brass, but at a lower price point. The durable anodized surface means these kick plates can be fitted inside or outside without fear of tarnishing or aging.

PVD Polished Brass
PVD is a stainless steel kick plate titanium coated to mimic the appearance of a solid polished brass kickplate. Due to its stainless steel core, the kick plate will be extremely strong. It will not tarnish or age over time as a solid brass kick plate will. Finally, this finish is very low maintenance and is the best choice for interior and exterior use.

Polished Brass
Our polished brass Kick plates are manufactured from solid brass sheets. The radiant surface is polished to perfection. Please note, This material is NOT lacquered, which will allow the aging process to develop a more somber patina. You can prevent this with regular cleaning using a specialist brass polish. If you want a polished brass appearance that required little to no maintenance and will maintain its shine, we recommend you chose the PVD brass finish instead.

Satin Brushed Brass
Satin brass is a solid brass sheet with a brushed sateen finish. The warm grain finish running along the plate adds a touch of quality to the material.

CUSTOM KICK PLATE AND PUSH PLATES ONLY - ALUMINUM MATERIAL FINISH OPTIONS

Satin Anodized Aluminum

The Satin Anodized option is the most popular finish in the range. These kick plates feature a clear anodized surface finish, which allows you to see the natural silver of the aluminum.

Brass Aluminum

A matt gold finish, which is similar to brass and PVD brass, but at a lower price point. The durable anodized surface means these kick plates can be fitted inside or outside without fear of tarnishing or aging.

Black Aluminum

A solid matt black appearance. Black is a popular choice for both traditional and modern doors. The strong and protective anodized finish means you can fit this finish to your front door without fear of chipping or the plate losing its color.

Bronze Aluminum

A matt Bronze/dark brown finish applied to the aluminum sheet. Bronze Aluminum is a more cost-effective alternative to oil rubbed bronze and imitation bronze. You can also comfortably install this finish outside, where it will be exposed to the elements without it affecting the quality of finish.

Satin Nickel Aluminum

This has a fine grain finish with a similar appearance to Satin Stainless steel, but a more cost-effective solution. As the material is solid aluminium, it will be suitable for use indoors and out without fear of rusting.

CUSTOM KICK PLATE AND PUSH PLATES- BRONZE MATERIAL FINISH OPTIONS

	<p>Oil Rubbed Bronze</p> <p>A dark brown/matt black finish that has a warming effect. It has subtle reddish brass tones to achieve an authentic-looking aged patina. The finish is sealed in with a protective beeswax finish.</p>
