

*Whitey travels to Chicago by airplane, he arrives at Chicago's Midway airport, then travels by vehicle to the DuSable Museum Of African American History. A group of South Side residents are waiting to see Whitey speak.*

Good evening Chicago and good evening to the state of Superior! It is so good to be here in the South Side today. I see many people are here to see me speak, it is such a good sight to see. I decided to make a trip up here because I see every day that Governor Baines and the elected officials here in Superior do not give a damn about the inner city and clearly do not give a damn about black voters.

Governor Baines is a far left sociolast. He is aligned with the likes of Tripp and his far left gang. Baines is a part of that gang. The left does nothing for the inner cities they claim they care about. They ignore the real issues and instead dream up these horrible solutions that they think would work. They ignore crime and creating jobs but instead focus on defunding the police and the green new deal, it's almost a criminal act.

The left likes to say that black lives matter but if you follow the money the donations go into the hands of a few democratic politicians and activists. Perhaps we should check the bank accounts of Baines and Tripp? Who knows what we'd find. But the fact of the matter is that the democratic party has failed the inner city and has failed black voters.

Has Governor Baines and presidential candidate Tripp ever come to the South Side? I've never seen them here and quite frankly they don't want to come here and be confronted over their betrayal of the black citizens here.

The people that live in inner cities and The South Side don't want defunded police and the green new deal. They want safe communities and investment in their areas. People shouldn't have to be afraid at night or worried about crime because citizen safety should be the top concern for elected officials. But for Democrats, citizen safety comes last and stuffing their own pockets comes first. Crime must be stopped in the inner city and there must be investments made in the inner city to bring jobs. But Democrats are too concerned about open borders, the green new deal and defunding the police. They'd rather dream up some delusional plan than think of common sense solutions that would affect the lives of americans.

Another big thing that isn't talked about is the usage rate of narcotics in the inner cities and quite frankly everywhere in America. Things like fentanyl,oxycodone,heroin and many other bad things come through the southern border. The Democrats don't want to talk about that folks it's a shame.

Folks, don't be surprised if Democrats start to put together some package that is supposed to take care of the inner city. It's what they do when confronted with their failures and bad policies, they suddenly spring into action when called out or during election time. Then if they win they forget what they said they were going to do. The Democrats are huge frauds and I would

include your Governor Baines and Dixie Governor Tripp in there because the whole time they have been frauds. They are far left socialists and quite frankly communists.

Folks, It's about time I wrap this up and go tour the museum. I will gladly be awaiting a response back from Governor Baines and Governor Tripp. I bet their faces will be bright red while reading this cause once again they've been exposed. Folks, it's been a pleasure speaking to you all and may god bless you all.
