Dear Rockland School Community:

The Rockland Public Schools are taking a number of steps to further ensure staff and student safety with regard to minimizing the spread of the COVID-19 virus.

Based upon Governor Baker's recent declaration of a State of Emergency throughout the Commonwealth and as recommended by state and local health officials, the Rockland Public Schools are postponing all field trips, in and out-of-state travel, and school and community events involving external parties until further notice. We will work closely with our school and community leaders to reschedule as many of these opportunities as possible when it becomes safe to do so.

During the school day, we will continue our day-to-day operations with an increased focus on daily cleaning and disinfecting. Regular before and after-school activities will continue. **Building principals will provide specific details about the events that are being canceled or postponed.** Please continue to check our website for updates.

We are in constant contact with local, regional, state, and federal health officials. We will continue to monitor and assess this ever-changing situation and provide you with timely updates.

Sincerely,

Alan Cron, EdD.

Superintendent of Schools
