Objective: Seeking position as a Network Specialist/Administrator/Engineer in Okinawa, Japan

Summary of qualifications:

- Active US Secret clearance.
- A+, Net+, Sec+, CCNA
- 4 Years as a Tactical Data Network Specialist (USMC).
- Prior business co-owner/operator at Glitch Gaming.
- Outstanding ability to quickly and efficiently troubleshoot network issues.

Work Experience:

2008 – 2012 (Tactical Data Network Specialist (USMC))

- Configured LAN/WAN Network equipment for training exercises and real world operations consisting of over 300 users on average on three separate networks (SIPR, NIPR and Coalition) configured VLANs, VTPs, Inter Vlan routing, Spanning Tree Protocol, Advanced ACLs, SSH, EIGRP, BGP and Static routing in Cisco Hardware.
- Built and deployed Microsoft Windows 2003/2008 servers with Domain Controller, Active Directory, Exchange, DNS, DHCP, and WSUS capabilities in stand alone and virtual environments (VMware).
- Built and maintained Server/Client images to meet mission/user requirements while adhering to Information Assurance standards.
- Setup and managed help desks, verified that all systems were operational and kept track of trouble tickets and enforced a quick response time/resolution.
- Regular duties also consisted of configuring Tandberg VTCs, Fortigate firewall equipment (with penetration testing), Global Broadcasting System (GBS), KIV7-HS/HSB/KG-175s, network storage in conjunction with assigning appropriate permissions, running Retina scans, Norton Ghost backups, and maintaining daily inventory of all equipment

2005 – 2007 Glitch Gaming (co-owner/Operator)

- Configured a 1Gbps LAN with wired port Security and Wi-Fi security for BYOC setups.
- Assembled over 20 high end Windows XP workstations with a SmartLaunch overlay.
- Setup a Microsoft 2003 server running SmartLaunch server to include managing of 700+ users over a period of 2 years, ISO image hosting (to bypass the need for CD/DVD authentication), automated daily back ups of the user database, implemented all updates via WSUS and published usage/earning statements with SmartLaunch.
