

Gifted & Talented - Integrated Enrichment Notification for Grades K - 3

October 15, 2025

To the Parent/Guardian of Student Full Name,

At the River Edge Public Schools, we are committed to recognizing and nurturing our students' unique talents. During the 2025-2026 school year, students will receive different forms of support in our Gifted & Talented tiered support model.

After thoroughly reviewing our benchmark assessments, I am delighted to inform you that your child has been identified as having a natural aptitude and has been chosen to benefit from additional instructional services for **Integrated Enrichment**. This is a unique opportunity that your child has been given to be part of an innovative educational framework that seamlessly blends various subject areas to create a holistic and interconnected learning experience. It goes beyond traditional boundaries, allowing students to explore connections between different disciplines, fostering creativity, critical thinking, and a deeper understanding of the world around them.

By participating in this program, your child will further develop their critical thinking skills and cultivate a love for learning. Your support as a parent is crucial in this journey. I encourage you to actively engage in your child's involvement in this program and look forward to witnessing their continued growth.

Additional information about the Gifted & Talented program is on the River Edge Public Schools' Curriculum page on the district website. Please also feel free to contact your child's teacher, Brooke Geller, Supervisor of Innovation Assessment and Special Projects, at gellerb@riveredgeschools.org or me at hafersn@riveredgeschools.org if you have any questions.

Sincerely,

Nancy Hafers
Gifted & Talented Coordinator
River Edge Public Schools
