Abstract

Introduction/Main Objectives: *Describe the topic your paper examines. Provide a background to your paper and why is this topic interesting. Avoid unnecessary content.* ***Background Problems:*** *State the problem or economic/business phenomena studied in this paper and specify the research question(s) in one sentence.* ***Novelty:*** *Summarize the novelty of this paper. Briefly explain why no one else has adequately researched the question yet.* ***Research Methods:*** *Provide an outline of the research method(s) and data used in this paper. Explain how did you go about doing this research. Again, avoid unnecessary content and do not make any speculation(s).* ***Finding/Results:*** *List the empirical finding(s) and write a discussion in one or two sentences.* ***Conclusion:*** *Provide conclusion(s) and implication(s) of your research. What conclusions did you get and what are the implication(s)? What is the main take-home message?*

Introduction

What is the purpose of the study? Why are you conducting the study? The main section of the article should start with an introductory section, which provides more details about the paper's purpose, motivation, research methods and findings. The introduction should be relatively nontechnical, yet clear enough for an informed reader to understand the manuscript's contribution. (TNR, 12, 1.15 Spacing, Justify)

Literature Review

The second section, Literature Review, focuses on identifying and addressing gaps in the existing literature. All ideas should be presented clearly, logically connected, and well developed. This section provides the basis for the research questions and the formulation of hypotheses aligned with the research objectives. The use of recent primary sources from reputable international, top-tier journals is strongly recommended.

Research Methods

Explain in detail about the research design, settings, time frame, variables, population, samples, sampling, instruments, data analysis, and information of ethical clearance fit test. The method of this paper is library method, library method is the method that emphasize the use of literature as the primary data source. This research is a quantitative study that applies the Johansen Integration Test and Vector Error Correction Model to see the long-term impact and shock response on certain variables…(TNR, 12, Justify).

Equations should be numerically numbered consecutively in parentheses with aligning right margin, and it can use either the same font (Times New Roman) or the formula font.

$$RY = \alpha + ßX + \varepsilon \qquad (1)$$

Result and Discussion

The results are reported in sufficient detail to clearly demonstrate the statistical analyses conducted and the rationale for their selection. This presentation enables readers to understand how the analyses address the research objectives and supports the conclusions drawn from the empirical findings.

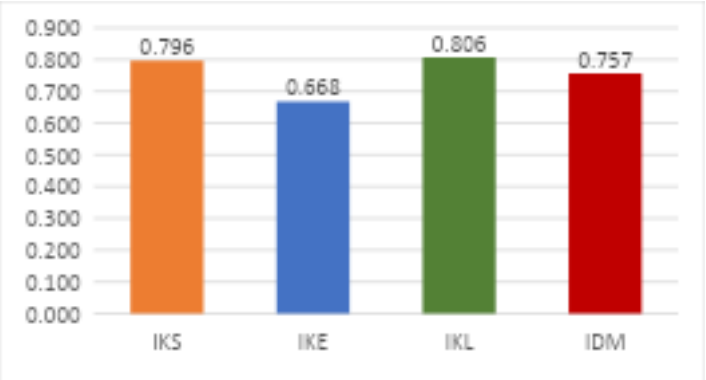

This section also provides a discussion and analysis of the results by explaining the underlying reasons for the observed outcomes. Rather than merely describing numerical values or figures, the discussion links the results to relevant theories and empirical evidence, thereby addressing the research gap that the study seeks to resolve. All tables and figures are presented within the relevant sections of the article to support the analysis.

Table 1. Title of the table….

Column 1	Column 2	Column 2	Column 2
Abcde1	0.xxx	0.xxx1	0.xxx2
Abcde2	0.yyyy	0.yyyy1	0.yyyy2
Abcde3	0.zzz	0.zzz1	0.zzz2
Abcde4	0.aaaa	0.aaaa1	0.aaaa2

CONCLUSION

Conclusion should be explained clearly related to hypothesis and new findings. Suggestion might be added contains a recommendation on the research done or an input that can be used directly by consumer (TNS, 12, Justify)

REFERENCES-

The author-year notation system is required and completed. All reference mentioned should be written down in reference using APA 6th Edition style and arranged from A to Z. Articles have minimal 25 recent references (last 10 years) and 80% is journal. All cited references must be mentioned in in-text citation.
