

SL: It's FREE

Hey Nick,

I agree with your video on "the importance of building muscle." Working out and achieving abs brings more pride and happiness than opting for surgery, which also comes with health risks. I like your response to the comment about having money and the importance of making thoughtful choices.

I can enhance the effectiveness of your sales strategies for your lower priced products such as "Complete fat loss guide + routine" by changing the words as they are not tailored to your customer's needs which can negatively impact the relationship between you and the customer.

I was browsing through your website and found that your sales pages lack the powerful enchantments needed to impact the reader at a deeper level. These enchantments can be harnessed by what I like to call the "Conversion Catalyst Formula", which I have seen your top competitors thriving by using it.

It will help your customers feel more valued and loyal and move up to purchasing your higher tier products.

And I can double the impact of the formula by utilizing enchantments in a different and superior manner compared to your competitors.

I specifically selected you as I was brainstorming ideas and came across your videos. Curiosity led me to evaluate if you met the criteria, and it turns out you were an ideal match. This alignment is the reason I'm extending this offer to you.

Would you be open to me sending the free value over to you?

Elmuntin
