

JD For Chief IT Architect

Job Title: Chief IT Architect

Company: [Company Name]

Location: [City, State]

Job Description:

We are looking for a highly skilled Chief IT Architect to lead the technical direction of our company's IT infrastructure. The ideal candidate will have a strong background in designing and implementing complex IT systems and will be responsible for providing technical leadership to the IT department.

Key Responsibilities:

- Develop and maintain the company's IT architecture and technical roadmaps
- Evaluate and recommend new technologies and solutions to meet business needs
- Lead the design and implementation of complex IT systems
- Ensure that all IT projects align with the company's business goals and objectives
- Manage and mentor a team of IT architects and engineers
- Provide technical leadership and guidance to other departments within the company
- Establish and maintain relationships with key stakeholders, including vendors and external partners
- Stay up-to-date with industry trends and emerging technologies

Technical Competency Requirements:

- Designs IT architecture using enterprise principles for optimal performance.
- Implements complex IT systems and solutions with precision.
- Applies cloud computing, virtualization, networking, and storage technologies.
- Ensures adherence to IT security and compliance standards and regulations.
- Utilizes enterprise architecture tools and methodologies to drive efficiency.

Behavioral Competency Requirements:

- Communicates effectively with stakeholders to align IT goals with business objectives.
- Collaborates with other departments to achieve common goals.
- Solves problems efficiently and makes informed decisions.
- Manages multiple priorities and projects simultaneously, delivering on-time.
- Applies strategic and analytical thinking to identify opportunities and risks.

Qualifications:

- Bachelor's degree in computer science, information technology, or a related field
- 10+ years of experience in IT architecture and design
- Experience managing and leading teams of IT architects and engineers
- Certification in enterprise architecture, such as TOGAF, is a plus.
