

MOCK CHALLENGE

Mock Challenge #1

This challenge consists of 120 questions.

Difficulty: ★★☆☆☆

Time limit: 75 mins

Good luck!

Taking the challenge — IMPORTANT

Please answer the questions below on [this spreadsheet](#). Instructions are also included.

You may set up a splitscreen with the challenge doc and the spreadsheet for convenience.

Art & Music

1. In which game would you MOST likely hear “Atom Bomb Baby”?
 - a. *Tap Tap Revenge*
 - b. *Overwatch*
 - c. *Guitar Hero*
 - d. *SimCity*
 - e. *Fallout*
2. Which artist would be MOST able to produce multiple copies of their artwork?
 - a. Tsukioka Yoshitoshi
 - b. Paul Sandby
 - c. Caravaggio
 - d. Umberto Boccioni
 - e. Julio Romero de Torres

- “Space is the Place”
 - “Justice Will Be Done”
 - “Nostradamus”
 - “Return to Innocence”
 - “Chariots of Fire”
14. Compared to “Tomorrow Never Dies”, k.d. lang’s “Surrender” could best be described as a
- tribute
 - remix
 - remake
 - competitor
 - update
15. If you wanted to introduce your friend to chiptune music, you would MOST likely play them the soundtrack of
- Portal*
 - Terra Nil*
 - Overwatch*
 - Tetris*
 - Donkey Kong Country*
16. Based on her selected work, Larissa Sansour would MOST likely be concerned about
- construction of high-speed rail in California
 - an oil spill in Kuwait
 - worldwide deforestation
 - rising temperatures near the poles
 - a nuclear disaster in Ukraine
17. The contours of *Unique Forms of Continuity in Space* suggest
- size
 - otherworldliness
 - symmetry
 - movement
 - stillness
18. The atmosphere of Prokofiev’s *Winter Bonfire* could best be described as
- celebratory
 - romantic
 - suspenseful
 - light-hearted
 - ominous
19. A New Age song is MOST likely to have lyrics promoting
- thrill and excitement
 - sustainable technology
 - revolutionary activities
 - religious worship
 - love and harmony

- Ghana
 - Sweden
 - Brazil
 - Australia
 - China
47. When reviewing a production by the Belarus Free Theatre, you would MOST likely say that it is
- provocative
 - elegant
 - conservative
 - classical
 - futuristic
48. A person that worships Odin would MOST likely also believe in
- Valhalla
 - Tartarus
 - happy hunting ground
 - Nirvana
 - Heaven
49. If you wanted to improve your performance using the Pygmalion effect, you would MOST likely
- focus on past failures
 - try to stand out from the crowd
 - seek constructive criticism
 - embrace novel experiences
 - set high expectations for yourself
50. You would MOST appropriately refer to the meta crisis as a
- climate crisis
 - economic crisis
 - social crisis
 - crisis crisis
 - doomerism crisis

51. You lead an agency that wants to stop population decline in your country. Which of the following measures should you suggest?
- banning euthanasia
 - increasing retirement age
 - extending parental leave
 - reducing immigration
 - expanding access to abortion
52. If your friend calls you “Einstein”, they are probably trying to say that you are
- stubborn
 - virtuous
 - kind
 - gullible
 - intelligent
53. A government would LEAST likely build a megaproject if its aim was to
- encourage tourism
 - promote regional pride
 - reduce pollution
 - create jobs
 - stimulate the economy
54. Imagine Alfred Wegener is going on a research expedition. His MOST probable destination is
- Greenland
 - Hawaii
 - the Mariana Trench
 - Australia
 - the Atacama Desert
55. How might Sam Altman solve the cost-of-living crisis?
- “Use more fossil fuels.”
 - “The central bank needs to stop inflation.”
 - “Raise taxes on the middle class.”
 - “Socialism is the better approach!”
 - “Invest more in AI technology.”
56. The Svalbard Global Seed Vault and the Global Oreo Vault are MOST similar in terms of
- date built
 - type of good stored
 - importance
 - geographic location
 - size
57. If you searched online for antique RCA collectibles, you would MOST expect to find
- airplane toys
 - automotive parts
 - radio receivers
 - sports memorabilia
 - digital cameras
58. An early Ford executive would MOST likely be concerned about whether their cars are
- large
 - stylish
 - affordable
 - safe
 - powerful
59. The tactics promoted by Extinction Rebellion to solve climate change can best be described as
- extreme
 - disorganised
 - conventional
 - do-it-yourself
 - creative
60. You would MOST likely credit the nostalgia cycle with a rise in sales for
- board games
 - cassette tapes
 - rhythm games
 - smartphones
 - hydrogen vehicles

Literature & Media

61. Which word would you NOT be able to put in the novel *Gadsby*?
- arbitrary
 - discussion
 - plug
 - difficult
 - elated
62. In “We Cast Our Eyes to the Unknowable Now”, Koreatown could NOT be described as
- modern
 - marginalised
 - unwelcoming
 - environmentalist
 - ruined
63. “*My father is a stately oak tree.
I, a bluejay.*”
- This quote MOST likely imitates
- “Fire and Ice”
 - “I Wandered Lonely as a Cloud”
 - “Ode I.11”
 - “Hail and Farewell”
 - “The History of Fire”
64. The central argument of W. B. Yeats’ “The Second Coming” is that
- heritage is valuable
 - only religion can unite humanity
 - anarchy is the best political system
 - predicting the future is futile
 - our society is collapsing

- have few friends
 - are seeking enlightenment
 - want to be immortal
 - have many possessions
 - are unsatisfied with their life
66. You would MOST likely write a golden shovel poem in order to
- gain a new perspective on language
 - rally support for a movement
 - pay homage to another poet
 - satirise famous figures
 - advocate for a controversial topic
67. Which of the following discoveries would be necessary to build a Predictor, as depicted in “What’s expected of us”?
- artificial general intelligence
 - cold reading
 - perpetual motion
 - telepathy
 - time travel
68. For which TV broadcast would you MOST expect to see grainy visuals?
- the “Miracle on Ice”
 - the Eurovision Song Contest
 - the Apollo 11 broadcast
 - the Kennedy vs. Nixon debates
 - the Neujahrskonzert
69. A situation would MOST appropriately be labelled “Kafkaesque” if it is
- absurd
 - emotional
 - stoic
 - depressing
 - familiar
70. Which character would you MOST likely see in an advertisement for an animal welfare agency?
- Yudhishtira
 - Odysseus
 - Nostradamus
 - Kimba
 - Josiah Bartlet

71. Based on his political rhetoric, Robert Menzies would MOST likely win the vote of a(n)
- a factory worker
 - a lawyer
 - a businessman
 - an exiled king
 - a member of an ethnic minority
72. Which literary device is most prominent in “Do Not Go Gentle into That Good Night”?
- allusion
 - simile
 - hypophora
 - plosives
 - refrain
73. The people of the Island of the Immortals can best be described as
- short
 - superhuman
 - overzealous
 - morose
 - healthy
74. If you wanted to be a cast member of *Epic: The Musical*, you would MOST likely have had to
- apply for a membership
 - submit a resume
 - join a theatre company
 - take singing lessons
 - upload an audition
75. A poem resembling Forrest Gander’s selected work would MOST likely include descriptions of
- apocalypse
 - polluted cities
 - future predictions
 - charred tree stumps
 - tributaries of a river
76. Which selected speech makes the MOST use of guilt-tripping?
- “We’re a great one too”
 - “The White Man and the Red”
 - “They’ll never take our freedom”
 - “Appeal to the League of Nations”
 - “A Tryst with Destiny”
77. As a friend of Winzy, you have just discovered something new on his body. He would pay MOST attention to it if it were a(n)
- scratch
 - pimple
 - ulcer
 - gray hair
 - rash
78. You are learning Italian online. This would NOT be possible without the contributions of
- Silvio Berlusconi
 - Dante
 - Gregor Mendel
 - Umberto Boccioni
 - Napoleon
79. An-My Le and Vivian Maier are MOST similar in terms of their
- upbringing
 - ethnicity
 - subject matter
 - inspiration
 - profession
80. You would MOST likely have trouble reciting
- “Fire and Ice”
 - “Lion-Eating Poet in the Stone Den”
 - “The Raven”
 - “[the whale already]”
 - “Do Not Go Gentle Into That Good Night”

Science & Technology

81. Which of the following people would MOST benefit from knowledge of solar terms?
- astronomers
 - event planners
 - mathematicians
 - farmers
 - diviners
82. In terms of megaprojects, the Big Dig might be MOST synonymous with
- poor execution
 - public dissent
 - large ambition
 - sustainability
 - corruption
83. AM radio stands for
- amplitude modulation
 - audio measurement
 - analogue medium
 - acoustic mixing
 - automatic modulation
84. Oxidation involves losing electrons. What is the opposite of oxidation?
- carbonisation
 - reduction
 - combustion
 - addition
 - neutralisation
85. A treated seed is MOST likely to have been
- genetically enhanced
 - grown in a lab
 - strip-cropped
 - coated with chemicals
 - selectively bred
86. For a heat engine to function, it requires its working fluid to
- oxidise
 - contract
 - undergo chemical change
 - dissipate
 - cool down
87. A pilot would MOST likely take advantage of the ground effect in order to gain
- stability
 - lift
 - weight
 - air drag
 - thrust
88. You visit a synthetic biology lab. What would you MOST likely see the scientists doing?
- developing sustainable farming
 - studying white mice
 - investigating tectonic movement
 - creating chemical fertilisers
 - engineering new cells
89. A critic of the Wankel engine is MOST likely to say that
- it vibrates too much
 - its combustion is inefficient
 - it only works with certain fuels
 - its convoluted design makes it break easily
 - it is too large to fit in most machines
90. If you wanted to get from San Francisco to Los Angeles, you would NOT be able to travel by
- high-speed rail
 - motorcycle
 - airplane
 - car
 - train

91. Which of the following could NOT be modelled as a chaotic system?
- imagination
 - double-rod pendulum
 - bathtub curve of electronics
 - weather patterns
 - three-body problem
92. Which product would have posed direct competition to magnetic tape storage?
- streaming services
 - cordless phones
 - paggers
 - instant cameras
 - floppy discs
93. If you wanted to take advantage of convection, you would MOST likely place your room's heater
- on the floor
 - above the roof
 - by the window
 - on the ceiling
 - in the bin
94. If Bertha was repaired and repurposed, it would MOST likely be used to construct a transportation system for
- hydrogen vehicles
 - zeppelins
 - hyperloops
 - flying cars
 - suspension railways
95. In a world where AI takes over creative industries, artworks and songs would MOST likely become more
- repetitive
 - coherent
 - diverse
 - pessimistic
 - innovative
96. Which of the following descriptions best describe the function of stem cells?
- they are rich in calcium
 - they can destroy aging mechanisms
 - they do not decompose
 - they can turn into any type of cell
 - they have high capacity for memory
97. An AI weather model like GenCast is MOST likely to rely on
- projected climate trends
 - historical weather data
 - solving systems of equations
 - astrological predictions
 - expert opinion
98. In a hypothetical system with known initial parameters, all future states can be predicted. This system is
- fractal
 - deterministic
 - probabilistic
 - chaotic
 - heuristic
99. Under what weather conditions would it be MOST useful to have anti-lock brakes?
- hail
 - wind
 - clouds
 - sun
 - snow
100. The word "amnesiac" refers to someone with very poor
- world views
 - imagination
 - logic
 - pattern recognition
 - memory

Special Area

101. What would you say if you wanted to show that you are a clairvoyant?
- "I'm a master at problem-solving."
 - "I tend to have this sixth sense..."
 - "I'm like a detective; I can deduce everything about you."
 - "Often I like looking into my crystal ball."
 - "I can predict the weather tomorrow."
102. *"Went to a fortune teller
To have my fortune read"*
- If you wanted to replace "fortune teller" with a synonym, it would MOST likely be
- shaman
 - augur
 - wizard
 - soothsayer
 - babalawo
103. Which method of starting a car would MOST likely get you into legal trouble?
- key ignition
 - hot wiring
 - jump starting
 - push button start
 - key fob
104. You are writing a novel involving divination. You would MOST likely have to worry about trademarks if the method of divination was
- I Ching
 - crystal ball
 - fortune cookies
 - omikujī
 - Ouija board
105. What would be the most suitable advertising slogan for a company offering active imagination services?
- "There's a world of fantasy in every child."
 - "No more waking up at 3AM."
 - "Discover Your Unconscious"
 - "The Transcendental LSD Experience"
 - "Unlock your treasured memories today."
106. A person who is afraid of blood may want to avoid performing
- haruspicy
 - astrology
 - ornithomancy
 - physiognomy
 - hydromancy
107. You would MOST likely find a chierosiphon featured on the YouTube account of a
- home improvement guru
 - historical weapons enthusiast
 - solarpunk forum poster
 - cooking show host
 - viral psychic
108. You are given access to a list of people that have signed up for cryopreservation. They are MOST likely to be
- muscular
 - middle-aged
 - wealthy
 - female
 - American
109. If you wanted to perform comparative horoscopy, you would MOST likely seek the help of a(n)
- physician
 - shaman
 - astronomer
 - priest
 - zoologist
110. Which of the following people are MOST likely to have a lighter on them?
- a gardener
 - a cyclist
 - a beggar
 - a smoker
 - a chef

111. An opponent of physiognomy is MOST likely to say that it promotes
- mass hysteria
 - self-fulfilling prophecies
 - stereotyping
 - extremism
 - pollution
112. A fire striker is struck against a sharp rock to spark a fire. This sharp rock must also be
- hard
 - difficult to melt
 - white
 - soft
 - porous
113. Which of the following is the MOST accurate translation of “carpe diem”?
- don’t hunt for answers
 - the future’s no one’s affair
 - take the present
 - be patient
 - do what you must
114. You are MOST likely to find igneous rocks near a(n)
- bustling city
 - volcanic site
 - river basin
 - archaeological site
 - country park
115. Which of the following developments might be harmful to an astrologer?
- the use of the Metonic cycle
 - advancements in AI technology
 - horoscopes being published in newspapers
 - the adoption of the scientific method
 - the passing of a comet
116. Which of the following people might be MOST interested in the National Collection of Type Cultures?
- a professional athlete
 - a polar researcher
 - a gastronomer
 - a vaccine researcher
 - a climate scientist
117. If you asked a Disney executive to describe the company’s innovation, they would MOST likely reply that it is a(n)
- trial-and-error process
 - unique artform
 - celebration of learning
 - expensive waste
 - step-by-step process
118. To be an effective hand drill, a wooden rod needs to be
- thin and sharp
 - curved and soft
 - heavy and heat-resistant
 - strong and hollow
 - short and wide
119. A diviner taps a filled cup and interprets the sounds produced. They are performing
- ceromancy
 - scyphomancy
 - bibliomancy
 - tasseography
 - pyro-osteomancy
120. It’s 2022. Which volcano are you MOST likely to see in the news?
- Yellowstone
 - Hunga Tonga
 - Mount Vesuvius
 - Huaynaputina
 - Eyjafjallajökull
